Subject: Docket 160021-EI - Fort Lauderdale citizens against FPL rate hike

REF: Docket 160021-EI
FPL Rate Hike

Dear Florida Public Service Commission,

Due to the FPL rate hike hearing being conducted during work hours in my area, I as most working residents of Florida, could not attend to voice our view "against" the FPL proposed rate hike. I hope that you realize that this fact definitely hurt the turnout "against" the rate hike when FPL paid supporters to be at the meetings who do not represent the true majority of the consumer voice.

FPL has not shown that it is spending its \$\$ with honest business practices in mind for pro-consumer clean energy benefits.

As an example, they spent 4.1 billion \$\$ of profits (received by their consumers) to form, support and promote a sham solar organization deceptively called " Consumers of Smart Solar", which was formed purposely to derail net metering and more freedom for consumer's for their independent residential solar generation.

As a business FPL wants to make \$\$ of course, but to do this with deceptions should not be rewarded.
Another example is the charging consumer's for a proposed nuclear reactor that is not even being built yet if at all.

We do not believe that an already extremely politically powerful company should be given more freedoms an benefits, and as we know making more \$\$ will enable them to do more of the deceptive practices toward consumer's, to increase it monopolization of energy for consumer's.

Our country is built on freedoms and a regulatory authority such as the Florida Public Service Commission should not support this kind of poor business practice by approving a rate increase such as FPL wants which will not benefit the consumer but is for the sole purpose to increase shareholder profits and their ability to have more of a monopoly on our energy future.

I represent a community in Tarpon River part of Fort Lauderdale and we are against the FPL rate hike.

If you would be so kind as to respond to this email so that we know that it was received and read. Thank you.

Regards,

Denise Fox
