Subject: FPL

There is no way that they should have that high of increase. There profits are so high let them use that money rather than stealing from the people that take care of them each month. The problem is we don't have a choose on where to get there power. If you want to have retirement people like myself start leaving Florida that will and can happen. FPL sends out letters that said they are lowering our rates. That's what we said last year. I don't know of any company that deserves a 23% increase to customers. I think this is totally WRONG.
