Please do not permit this to pass on the docket. Docket # 160021-E1.  
I can barely afford my bill as is. My husband passed away from cancer and was the main earner, and I can hardly get my head above water to keep a roof over my head. I do not need the electric bill to go up. Especially if it isn't going to help with electric and only support people who are investors.
