*They are not asking for more money to develop new techniques in order to lower our bills of light and power but they are asking for more money for shareholders.
Its not fair with us seniors, retired people who don't have any option other than accept the increase!
Its not only 23% increase but everything that comes with it!
We already struggle to pay for medication, housing, etc
Do you think it is fair that some folks will cut on their food so shareholders will make more money with their investments?!
Is it fair?! No it is not!
Please do not allow this to happen!
Thank you,*
