Subject: Florida Power and Light increase

There are people like myself age 67 will be 68 in October. I get only \$924.00 per month to live on. I have no savings it takes all I get to pay my bills. I get no food stamps and don't want them and most months my electric bill is higher than my food bill. I have attempted to cut electricity bills by getting a gas stove and gas tankless water heater. I hang my clothes out instead of using a dryer. In this heat I can't afford to stay comfortable in my home. Some months I have to miss paying other payments to pay my electric bill, if you are 1 day late paying it you are charged \$5.00. That may not seem like a lot of money, but when you live on a fixed income that could be the difference of a couple days of making tomato soup out of packages of ketchup to eat.

I beg of you please do not FP&L get richer off the people.
