Subject: FPL rate hikes

FPL already charges rates that are too high and use much of this to pay for out of state projects, CEO and top officers' pay packages, and excessive increases for shareholders. The FPL increases being sought to increase shareholders income are much higher than any working person's salary increases and is especially devastating to Florida's senior population on fixed incomes. Additionally, the shareholders' rate of return increase being sought is much more than most investments are paying today and the increase should not be borne by a captive market.
