As the hearings begin on the FPL 1.3 billion dollar increase in our base charge, I wanted to voice my strong objection.

In light of FPL's 2015 hefty profit in 2015 and the projected profit this year (under the guise of NexEra) I firmly believe that this increase is totally unnecessary.

This 25% increase will be a true hardship on seniors and the poor as electricity is a necessity, especially during the hot summer months.

FPL might consider reducing waste in their operation. For example: The 90 million dollar breakup fee with the Hawaiian utility; estimated 50 million dollar cleanup at Turkey Point, and the constant advertising about how great they are, might be some of the ways the utility could reduce costs. Oh, and let's not forget about FPL's contribution to Amendment One "consumers for smart solar". Our dollars to an amendment that effectively eliminates the solar industry in Florida.

I have never written to the PSC. I appreciate all you do to keep this public utility in check.

Sincerely,

Chris Bromfield

**Subject:** Florida Power Rate Increase

Hello,

Please vote against the utility rate increase on Florida customers of \$8.50.

Thank you,  
Christopher Benjamin
