Subject: Re: Docket #160021 FPL rate increase question and netmetering

Is there an update to this FPL rate increase? Can I submit a letter on my opinion on this matter?

Mr. Osborne:

Thank you for your inquiry. Any impact, if at all, will not be known until after the Commissioners decide on the case later this year. There is a technical hearing in August when all issues in the case will be discussed that you may watch from our website.

Thank you,
Cindy

Hello thanks for your last prompt response, I have another question.

Will this rate increase have any impact with interconnect agreements and netmetering credits? If so, what kind of affect will it have?

Since it increases revenue for FPL, will that make for more generous net metering rates for those that have their own solar energy arrays? Or will it affect any other kind of incentives for home use of customer owned renewable energy generation?
