Subject: FPL rate hike

"I oppose FPL's rate hike request for gas-burning power plants that are unnecessary. I am particularly concerned that the new billion-dollar expenditures on gas plants in FPL's rate increase proposal will needlessly expose me and my fellow Floridians to more expensive electricity now and in the future. I want FPL to invest in affordable solar energy instead."

Comments:

There needs to be protection for consumers and the environment, both have been ignored. While consumers struggling to pay bills get no return on their bank deposits, FPL seeks more profit for its share holders and money to build fossil fuel plants while cities like Miami Beach, and St. Pete flood regularly due to rising sea levels. If the increases were all funneled to clean renewables I would be onboard. Miami Beach alone will spend over 400 million combating climate change over the next five years. Deny all of this increase for water intensive fossil fuels and step up to the fighting for a sustainable planet.

Subject: Rate Hike

I am a full time resident of Cocoa Beach. I oppose the rate hike requested by FPL. They are doing extremely well financially and I see no need whatsoever for a rate hike.
