Mr. Seifert,

Thank you for your email. Unfortunately, the information you provided regarding rainfall does not provide the information we were requesting. Question 9 states; "What steps has the Utility taken to obtain water usage information from the local water provider? If the information is available, please provide a schedule of the water gallons used per month by customer and meter size from June of 2015 through June of 2016." Please explain the steps that the Utility has taken in communicating with the local water utility to obtain water usage information, and if that information has been provided, please provide it.

Thank you, and please contact me with additional questions.
