Subject: PROPOSED INCREASE IN GULF POWER ELECTRIC SERVICE RATES IN JULY 2017

While Gulf Power's need to invest in long-term reliability is reasonable and understandable, why would the Residential Service increase by 6.90% while all other users listed in their "flyer" to their customers would pay less? I would imagine that the total consumption of electric service by residential consumers would exceed that used by companies, etc.. So, why 6.9% (largest increase listed on the "flyer") when others listed would have a smaller increase? Jack Capps.
