Subject: Docket No. 160168-EI - Gulf Power Rate Increase Request

Dear Ms. Kelly:

Thank you for contacting the Florida Public Service Commission (PSC) about Gulf Power Company's (Gulf) rate increase petition. Your correspondence is included in Gulf's rate case docket file (No. 160186-EI) to give Commissioners and staff an opportunity to review and understand your concerns.

Service hearings are scheduled in Pensacola on January 26 and in Panama City on January 27. I encourage you to attend one of the hearings, so that you can directly speak to the Commissioners. All customer comments—written and verbal—become a part of the record and will be reviewed and considered when PSC staff prepares its recommendation to the Commissioners on Gulf's petition.

Gulf's technical hearing before the PSC will be in March in Tallahassee. Witnesses from the utility, the Commission staff, the Office of Public Counsel (representing Gulf customers), and other intervenors in the case will present testimony, introduce exhibits, and be cross-examined before the Commissioners. Commissioners will review Gulf's need for a rate increase, its existing and proposed rate structure, and its ability to provide safe and reliable service.

Commissioners are charged with making sure that Florida's utility companies fulfill their service obligation. In its petition, Gulf based its request on several factors, including transmission projects and replacing and repairing infrastructure. The PSC will ensure that final customer rates reflect only those costs that are prudent and necessary for Gulf to deliver quality electric service.

You can find Gulf rate case information on the PSC's website, www.FloridaPSC.com. Access the Clerk's Office tab, then hit Dockets and type in Docket No. 160186. All case submissions can be found in the Documents Filing Index. If you have additional questions or need further assistance, please call PSC Consumer Assistance at 1-800-342-3552.

Sincerely,

Bev DeMello
Assistant Director

Office of Commission Clerk

I have been a 30 year consumer of Gulf Power and generally satisfied with the service they provide. I was very surprised to get the notice of their proposed rate increase of a high 6.9%. Since I cannot attend the meeting in Pensacola on

January 26 I would like you to know that this large increase will be very hard on residents, particularly on Senior citizens. Gulf Power continually tells us they are making power costs less expensive through their use of wind, solar, and natural gas. If true then why the rate increase? As our temperatures have increased over the past few years our power costs have already been at record highs. Seniors have need to keep their homes in moderate temperature ranges since we have greater health risks. I believe this rate increase would create major financial problems for many of us.
