Dear Sir:

COMMISSION  
GOVERN  
The intent of this request is to respectfully request that your committee reject the request of Gulf Power Company to grant them their request for the increase to increase their rates of \$106.8 million to our power bills which would make an increase of ~~\$~~ \$10.82 to our power bills.

This would put too much of a burden on our power bills per month.

If you will investigate the records of Gulf Company you will see that this is not needed, please look at their profits as of now.

If this request is granted the Gulf power could spend more money for what ever they want to do to make additional profits.

We the customers can not afford this additional power bills just to make their spending for others not needing.

The economy can not justify us being required to pay our daily expenses at this time.

Mult power does not need this to spend  
for whatever they want to make a larger  
profit. They need to spend for that which  
they need and not for anything they want  
to make more money.

I respectfully ask you to not grant this  
rate increase. please think of us the  
public that is trying to make needs made.

Sincerely  
Houston A Watson
