Subject: Gulf Power Rate Request

Gulf Power's rate requests is clearly not appropriate:

- Inflation has been running 1-1.5% for the last several years
- Energy prices have dropped dramatically and all forecasts continue to show that energy costs will stay muted.
- Salary and other costs of doing business should not rise more than about 2% per the FED.
- A raise of 6.9% is clearly unwarranted.

- A base rate manipulation to place more fixed costs defines logic:

- It discourages conservation and encourages utilization
- Increased utilization builds an argument for the GA plant's costs to be transferred to Florida or worse to then build an argument to build a new bigger plant here..

Finally an investigation should be run to determine if GP used any monies or human resources charged to rate payers to run its solar power amendment.

Thank you.

Comments:

Please do not let Gulf Power get away with their \$30 per month fixed rate increase. That is nothing but robbery especially to retirees on limited incomes like myself. I rarely use my heat or a/c, but if you let GP do this, it won't matter and that is exactly what they want-to take control away from consumers. I hope and pray you do not let them do this.
