Subject: FPL Request for electric increase

As a taxpaying and electric using citizen, I find it absurd that FLP is asking for a 23% rate increase. Why not ask for additional resources to encourage homeowners to invest in solar systems? Oh, I know why, it would cut into their profits and THEY would need to recoup/purchase back any electricity produced by consumers' solar systems.

I believe Florida is considered the Sunshine State, why not encourage the usage of aa natural resource rather than digging into the earth to find resources not readily available- we do have daily access to the sun! I am not against "big business" but as a consumer there are few choices than FPL for electrical power users in South Florida. I encourage the PSC to deny the request of the rate increase from FPL.

Sincerely,
Diane Horodowich
