Hi Catherine,

Thank you for your response. We will move DNs 04738-17 and DN 04739-17 to from undocketed matters (170000) to new Docket 170146, per your instruction below. Yes, the prog mod information can be updated later today.

Thank you for your help!

Dorothy

Hey Dorothy,

In response to your question on No. 7, I did mean to check both items, supporting documentation attached and documentation to be provided with recommendation. I realize now that the attachment (DN 04738-17) didn't necessarily need to be attached since it can be moved from the undocketed matters to this newly created docket. To clarify, yes, please move DN 04738-17 and DN 04739-17 to this newly established docket.

In response to the question on the prog mods, I have a question for you! Can this/these codes be updated later today?

Thanks, Dorothy!

Catherine

Subject: Another New Docket Question

Hi Catherine,

We are in receipt of a second request to establish docket for Global Connection (transfer of control). I note that No. 7 says, "check one" and both items are checked. The attachment appears to be a copy of DN 04738-17.

- Do you want DNs 04738-17 and 04739-17 moved from undocketed matters to the newly created docket?

- If so, can the letter be detached from the request to establish docket and either of the check boxes for No. 7 be unchecked?
- The prog mods requested are A19 and B11. Should that be B1j instead?

Thank you for your help.

Dorothy
