Comments:

FPL proposal for two new reactors at the turkey creek site has some implications that would leave the consumer shouldering the bill when there is no intention for this proposal due to construction contractor (or lack of one). The reactor project is so speculative FPL can't say whether it would even be a good deal for customers. I would ask the this organization denied this application until some basic questions can be answered. I know myself and others are contacting the governor and representatives to issue a standing on this matter...

Thanks  
James Darryl
