Subject: Water Rate Increase
Importance: High

I live in 32779. I do not agree that Utilites Inc should get passage for the requested rate increase of 130%. We have NO other options for water, thus they can do anything to homeowners. Allowing them to do this hike, will just open the door for increases and request in the future. I am a T-12 Paraplegic. I live on a fixed income. I donate MH services to the community. I give back, even though my life has been hard for 33 years. Please do not allow them to step on us and take what we have. It is wrong. This amount of increase in this 32779 is not across the board, is unfair and burdens us to an unbearable degree. Please take a STAND for us. We the Owners are counting on you!
