Subject: Docket No. 20170009 - Oppose FPL's Unfair Request

Dear FL PSC,

Dear Commissioners,

Please reject FPL's request in Docket No. 20170009. Nuclear power is NOT our future. With the radioactive waste issue from such plants still unresolved after many decades of effort, no one really knows the full cost of power being produced from existing nuclear power plants. What we CAN be sure of is that the future costs of decommissioning old plants and the safe storage of resulting nuclear wastes in perpetuity will be astronomical. FPL should not be pursuing even the possibility of building more nuclear plants. And if they are reckless enough to do so, they should not be allowed to charge those costs to current or future customers.

Sincerely,
Todd Logan
