Dear FL PSC,

Dear Commissioners,

Please reject FPL's request in Docket No. 20170009.

It is not fair for FPL to continue to heap the financial risk onto customers to pursue new reactors at Turkey Point, a project for which there is no builder. I understand the builder, Westinghouse, filed for bankruptcy and is out of the nuclear construction business. And apparently FPL will not commit to actually build the reactors, nor will it commit to a price tag. Further, the company can't even show that the reactors are in the best economic interest of their customers.

If the reactor project is so speculative that FPL cannot provide you with evidence that the project remains a good deal for customers, how can FPL then ask your permission to incur even more costs pursuing the licenses for the project, which ultimately allows it to recover its costs plus interest from customers?

Floridians have already paid too much for too long toward this phantom project: enough is enough; reject FPL's request.

Sincerely,

Sincerely,  
Susan Chandler
