**Attachments:** FPL wants more nuclear units; customers say prove they make sense.pdf

I was reading the latest news media article(s) regarding the latest Florida Power & Light Co. (FPL) electrical bill activities in the City of Pompano Beach, Broward County and/or the State of Florida with great interest. Please review and implement an action plan to thoroughly address this extremely troubling issue. Media reports continue to underscore the proposed spiraling out-of-control rate increase requests at an ever-increasing frequency in a overwhelming recessionary/depression economic climate adversely impacting all taxpayer citizens. It is imperative to initiate cost cutting FPL administrative and upper management salary(ies) budget measures of 5, 10, 25, 50 and/or 75% to relieve the ongoing unsustainable typical electrical bill inflicted disproportionately on its senior citizenry. In addition, news media clearly indicate that a significant amount of the electrical infrastructure throughout the State of Florida is dangerously compromised technically and logistical, potentially imperiling the taxpayers' lives, despite innumerable claims of "investment and/or improvements" of this very electrical infrastructure. Please coordinate, collaborate and cooperate on Federal, State and/or local jurisdictional levels in addressing these concerns potentially impacting adversely the public's finances, policies, trust, confidence, and quality of life issues. Thank you for your time in this matter and hope to hear from you soon.

Sincerely,  
Beatrice Balboa
