Subject: Proposed Expansion of Turkey Point Nuclear Power Plant

Dear Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850:

Please do not approve FPL's proposed expansion of the Turkey Point Nuclear Power plant. Expanding use of solar energy is a better alternative to dangerous, costly nuclear power.

I am not an expert on power generation, but I fear living close to a nuclear power plant. I remember visiting Peach Bottom as a child and learning about "Our Friend the Atom." Safe operation of nuclear power plants has proven to be a myth. Fukushima has shown that poor decisions can lead to disaster.

Our legislators and regulators should make use of solar power and battery energy storage a priority in the "Sunshine State."

Thank you.

Sincerely,

Charles N. Young, M.D.
