Subject: FW: Please don't make me pay for the Turkey Point Plant problems.

Good Morning,

Please see the e-mail below. Please let us know whether this needs to be entered in CMS as consumer correspondence, and what docket it should be placed in.

Sincerely,

Angela M. Charles

Subject: Please don't make me pay for the Turkey Point Plant problems.

Dear FL PSC,

Please do not make us taxpayers pay more money for our electric. We are paying more than enough and our costs have gone higher since it has gotten hotter in South Florida our air-conditioning bills have gone much higher. I am a school teacher, I have not received a raise in many years. I also have three children, a house and all the other expenses that everyone else has. I do not have anything fancy but I spend a lot of money on electric every month. I would love to go solar so I do not have to throw my money away when we could be receiving free energy from the sun. Please if you're going to approve anything approved solar panels on residential houses at a course that homeowners can afford.

I agree with this pre-written information that FPL should have to pay to clean up its own mess and hope you agree with it also. I can honestly tell you I don't know all the details about Turkey Point or the cooling canals but I do know a lot about my finances and paying for something that I was not a part of should not be coming out of my budget.

FPL customers shouldn't have to pay to clean up the Company's mess at its Turkey Point plant. It's not fair for customers of a company, which made record profits last year, to pay clean up costs for a mess that's been developing on the company's watch for 40 years.

The cooling canals have not been operating properly since the 1970's and have created a growing underground contamination plume in the drinking water aquifer. FPL should have acted prudently in addressing its problems with the leaking cooling canals long ago, but it didn't. It sat on its hands for decades and only recently began to consider the problem. Why should I pay for decades of mistakes by FPL?

I understand that an expert in the case says that FPL's clean up plan won't even work. The Company should find a solution that actually stops the pollution from leaking underground. Customers like me should absolutely not have to pay for FPL failing to take action earlier to stop the pollution and for a clean up plan that may not work.

FPL should clean up its own mess. Please vote to deny FPL's unfair request to saddle families with more costs and higher bills.

Thank you in advance for looking out for all of us, Susie Cox

Sincerely,
Susie Cox
