

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : jerry peisach

Electric Utility Provider : fpl

Zip Code : 33432

Category : Power restoration time

Comments : I am speaking on behalf of the Homeowners Assoc of Presidential Place Condominiums. Boca Raton suffered a mid level tropical storm with highest recorded sustained winds of 58mph and the highest recored gust at WPB airport of 79mph. Power was lost for 8 days and more days to recover cable and internet services. Concrete poles down 200 feet north of our bldng and wooden poles angled over from Wilma and never been replaced. The performance of FPL borders on the criminal. Millions spent on marketing how well they've strengthened the system. We've been paying surcharges for years to what avail. The most important question of all...what happens if WPB and Broward Counties get hit buy a cat1+ storm. Once and for all, those public servants charged with providing reasonable protections need to stand up and do their jobs.
