

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Jay Flynn

Electric Utility Provider : FPL

Zip Code : 33133

Category : Power restoration time

Comments : I was disappointed with FPL. I've heard how they spent \$3+ billion to upgrade their system yet a tropical storm hits us and 90% of users lose power.

I live in Coconut Grove. It's heavily wooded. Common sense would have the lines underground and deep enough so the tree roots don't tear them up if a tree falls over. As it stands now, we have to look at these horribly pruned trees all year long, plus go without power.

I understand burying the lines is not an absolute cure, but in our area, it has to help.

And where is the discussion on solar?!

Thank you
