Subject: FPL rate increase

Florida Power & Light receives a very large rate of return from its customers because their shareholders claim they take "risks". However, whenever their so-called "risks" turn to actual losses, they run to their bought and paid for friends at the FPSC and get them to stick us ratepayers with those losses. It is time for FP&L shareholders to bear the losses of their "risks" themselves. I oppose this rate request by FP&L.

this last outage for over a week and calls made to the FPSC before any crews showed up in the neighbor hood, when they did power was back in a matter of minuets not hours.
