Subject: Rebuild Florida With Solar And Energy Storage

Dear Commissioner,

Terry Blaes
Dunnellon, Marion Co., FL

Where we live, we have frequent power interruptions caused by thunder storms, squirrels, tree limbs, etc. They may last minutes or hours.

Then there are hurricanes. My memory goes back to Donna in 1960, but we'll stick to the present because we can finally see light—SUNlight—at the end of this tunnel.

Irma left us without electricity for 5 days, 4 hours, 53 minutes. I know many people (family and friends) who had it worse.

Here's the point: there is no excuse for the "Sunshine State" not to be working with determination to put an end to this recurring idiocy.

Florida MUST rebuild with solar and battery storage...and this energy must be available when the grid goes down!

Regards,
Terry Blaes

Dear Mr. Blaes,

On behalf of Chairman Brown, we have received your email dated November 10, 2017. The Commission Clerk has placed a copy of your email in Docket Correspondence, Consumers and their Representatives, in Docket No. 20170215-EU, *Review of electric utility hurricane preparedness and restoration actions*. Thank you for providing the Commission with your comments.

Shalonda M. Hopkins
