Subject: FPL

Hello,

I wish to comment on the FPL proposal to charge customers for the Turkey Point cleanup. Why should we have to pay for a monopoly company's bad decisions. FPL knew of the pollution problem since 1978 and chose to do nothing until it became a major issue. When an auto company makes bad ignition switches or a airbag company makes a faulty product, the consumers do not bail them out-and neither should we. What happened to the billions of dollars that you approved for FPL to do planning for a new nuclear plant that will never be built. It seems to an observer that your commission gives the green light to whatever FPL wants without the interests of the public defended.

Maybe FPL should pay their violations rather than pay the lawyers to try to beat them. Also, stop the TV ads that tell me how great FPL is. I would definitely shop for another provider if I had a choice. You are called Public Service Commission. Please serve the public not FPL.

Regards,
William Bucciero

Subject: FP & L Cleanup - \$200 million

Short of bankrupting the company, FPL shareholders must bear the brunt of this expenditure. Any taxpayer/government support must come only after an oversight group determines that they have paid their fair share.

My wife and I are vehemently opposed to granting FPL \$200 million or any amount of money to clean up Turkey Point. Why?

(1) FPL wastes tens of millions of dollars on advertising, from TV commercials and print ads to digital marketing, to congratulate themselves and their workers on what a great job they're doing. This is a wasted expenditure that should be discontinued and applied to the Turkey Point. Discontinue their advertising for 4 years and you've got HALF the \$200 million paid for!

(2) The Office of Public Counsel is correct that the 1972 federal permit to operate the canals makes clear that FPL bears the responsibility for making sure the canals work properly, not the State or consumers.

(3) FPL LIED to Floridians when it denied being the source of the plume UNTIL Miami-Dade county regulators found elevated levels and weeks later the State ordered the utility to clean up the canals canals and stop the leaks. FPL's breach of trust and lies should be reason enough to make THEM pay and not consumers.

FPL needs the dip into profits, rather than pass the \$200 million cleaning fee onto customers.

Please don't put corporate profit above citizens.

Corporations were created to add value to society - not to pollute our environment and ask citizens to pay for it.

This is a 'no brainer'!!

Please do the right thing!

As a business owner, I leased a space to a Tennant and they lessee cleaned car engines on weekends, contaminated the soil below the warehouse. It cost more then \$30,000.00 to dig up concrete, remove soil and send out of state.. This is much more of an environmental contamination. The stock holders, officers and board of director should be responsible! FPL should pay for their not monitoring the seepage. The damage needs to come out of profits, bonus and perks.. Bern Levine

Public Service Commissioners,

We are totally against FPL making residents/FPL customers pay for cleaning up Turkey Points canal pollution. It is FPL's responsibility since it is their lack of oversight in maintaining environmental cleanliness. Customers should not bear the cost of FPL's laziness.

Please, oh, please, wise ones! Pass this gift to FPL. Allow me to pay so that the company's profits may increase and you and your friends may receive the campaign contributions you so richly deserve. Thank you!

Please please please DO NOT let FPL pass the clean-up tab for fixing leaking canals on to their customers! We deserve a power provider that does not ignore dangerous conditions (they knew something was wrong years ago and did nothing) and letting them pass the costs onto us would only encourage them to do the same again and again. Please protect us from their mismanagement.

Subject: Turkey Point nuclear facility in South Florida.

Public Service Commission

Dear Sirs.

Before you request one more penny for Turkey Point, you should request an in depth investigation on the current status of the reactors and the structure. This is almost a 50 years old project that has not had a comprehensive revision and update, yet its very close to crowded neighborhoods.

Subject: FPL Request

Why should consumers pay for FPL's disregard for saltwater intrusion in the Turkey Point cooling canals. The blame only belongs to FPL. Did they think no seepage into the limestone bed not happen. FPL is a regulated monopoly and they need to spend some of their profits and not pass everything on to it's customers. They already have a guarantee percentage rate for profits. Your job is to protect the public not rubber stamp everything in FPL's favor. Deny their request for consumer payment.

RE: Docket Number: 20170007

Florida Light & Power is solely to blame for the negligence at Turkey Point and therefore responsible for cleaning up its mess. NOT FLORIDA CUSTOMERS OR THE STATE OF FLORIDA!! It's FPL's fault and they need to take ownership. Don't let this be another example of corporate greed passing it on to blameless citizens.

Subject: FPL pay for their own Turkey point cleanup

PLEASE do not allow FPL to pass the costs of their error at Turkey Point to be passed along to the public. We are under their thumb as they are a monopoly. Let the stop running tv ads. I am sure that would generate enough to pay for their errors. Please keep in mind the funds the public was forced to pay to upgrade their infrastructure and how that failed to come to fruition as noted by the massive problems a Cat 1 hurricane, Irma, caused.

They made the mistakes at Turkey Point, they should pay!

Personally, it is our feeling that much of the cleanup could have been totally avoided if FPL had done its due diligence by maintaining the power lines and the trees leaning on them as so many of us complained about them, and were ignored by the same authority wants a financial bailout for their lack of interest! No bailout, or they will never learn from their ignorance!

FPL should have contingency funds set aside already for these repairs.
Oppose customers being charged for the repairs.

Thanks
