ATT; PUBLIC SERVICE COMMISSION

F>P>L is responsible for taking care of the canals and they should be responsible for ALL costs.

Sincerely,

Bea Bernstein

Florida resident for 70 years

**Subject:** FPL

*We The public have until December 12<sup>th</sup> to contact the Public Service Commission about whether Florida Power and light should pass the \$200 million cleanup tab for fixing leaking canals at Turkey Point on to customers.*

*The bill for fixing SHOULD NOT be borne by customers! We have already paid ahead for increases.*

**Subject:** PUBLIC COMMENT: Case No. 20170007 Turkey Point

To the Commission:

We are longtime homeowners and Miami-Dade taxpayers who strongly agree with the Office of Public Counsel's argument that Florida Power & Light bears full responsibility for ensuring Turkey Point canals work properly and that all leaks are stopped.

Please act to protect our drinking water and our environment without penalizing us, the citizens, who all too often are forced to pay for corporate foul-ups. FPL's seemingly unassailable power frequently makes us feel voiceless. This time, we want to believe the PSC and the state of Florida will do the RIGHT THING.

Thank you!

Sigman L. & Cornelia T. Splichal

**Subject:** FPL issue -Docket # 20170007

It would be intolerable to allow FPL to charge customers for cooling canal cleanup when the utility's Federal permit in 1972 makes it clear that it has the responsibility to make sure the canal system is working properly and they have not done so.

**Subject:** FPL Turkey Point Clean Up

We do not believe that FPL should be allowed to pass on the tab for cleaning up the leaking canals at Turkey Point. FPL was aware, or should have been aware of the pollution they were creating and have the sole responsibility of paying for the clean up.

Do not allow them to pass on these costs to their customers.

Sincerely,

Francine Horwich and David Weinstein

**Subject:** Cleaning the Turkey Point cooling canals

FPL, by and large does an excellent job providing this state with consistent, inexpensive electrical power, but I am definitely against having the public charged \$200 million to clean these canals. It is the responsibility of FPL to do so and their 40 year delay is the reason it is costing so much now! They need to take this one on the chin!

Please dont make us pay for another of FPL's blunders. They keep taking and taking and they dont provide the service that we are paying for. We all should of never been out of power for that many days after hurricane Irma. And a while back they took extra money from us to be prepared, so where did that money go??

Now they want us to pay for their oversights on cleaning up turkey point. NO WAY... They knew about this mess for a long time and just shoved it aside. Quit rewarding them with these rate increases and assessments. They need to buckle down and conduct their business without digging into our pockets again. They sure love to waste our money.

Please dont reward them for not doing their job.

Sincerely

The question is asked, who should pay for this disaster? the answer is clear. management is responsible, shareholders elected management, and the customer base is innocent. charge the shareholders, i.e. have the company assume the costs of cleanup and correction, and not charge the customers by raising rates. curt burkhead, key largo
