RE: Docket # 20270007

To whom it may concern:

If I owned a business that leaked hazardous material into the ground I would have to pay to clean it up. I could not bill the public for that. I would have to pay this myself. Therefore, I should not be expected to pay for FPL's cleaning of the cooling canals. FPL should not be able to pass this on to us. Please do not allow this to happen.

Sincerely,

Susan Manley
