Dear Public Service Commission,

I am a student of The Cushman School, and I would like to share my opinion.

First of all, citizens should not have to pay this because with the high property tax, the increased tax rates, and all other taxes, it would be hard for people to pay for it. The average family of 4 would pay approximately \$800 dollars along with their regular taxes, coming to almost 29,000 dollars for a married couple.

Another reason for not imposing the bill on citizens, is because a lot of money is received through normal taxation. A way to pay this is to clean it up, then adjust numbers in the budget, lowering some places to make enough room in the budget for the clean-up. Ask for money from the government, emphasizing the fact that they are old and need replacement.

FPL has known about this, and should have incorporated it into the annual tax, replacing places at need most first. This would be an effective way.

Best regards,

Juhi Damley

**Subject:** Turkey :Point Nuclear Plant

Dear PSC,

There is NO doubt that FPL has greatly neglected their responsibility in keeping clean the areas, waters and land, around Turkey Point Nuclear Plant. The surrounding waters have a great deal of potential pollution, as the discharge of water has/ have greatly contributed to algae growth, the death of millions of fish and other aquatic wildlife, and endangered the greater South Florida community.

I would expect the PSC to be MUCH MORE concerned about the future area and waters NEAR and far from the nuclear plant and less concerned about any profits for FPL that might go down.....the company is its OWN WORSE enemy for its past behavior.

FPL's business practices, its past poor response to hurricane damage, and its disdain for the public for the past 3-4 decades have shown the the company is NOT very honest, and troubling for the future.....

Kenneth Newman  
North Miami, FL

Greetings,

As a native Miamian and lifelong resident, I strongly urge the Public Service Commission to deny Florida Power & Light's request to charge its customers for the mandated clean-up of Turkey Point's leaking cooling canals, which would cause catastrophic damage to our beautiful Biscayne Bay and drinking water wells. FPL has known about the leak, but denied it, for decades. It is the responsibility of FPL, a for-profit company, to clean up their mess. Their only concern seems to be for the shareholders who are guaranteed a certain return on investment, and this is a real travesty for South Florida. Instead of canals for cooling, they should have a cooling above ground tower like every other nuclear facility in the U.S., and they know it!

PLEASE SAVE US FROM THIS UNFAIR REQUEST TO PAY FOR FPL'S BAD DECISION MAKING.

Again, the only correct decision is to make FPL pay for their own clean-up, so they can finally start to become an environmentally responsible public utility.

Thank you in advance for your important consideration of this matter.

Regards,  
Martha Singleton

I am contacting the commission to ask that Florida Power and Light be held accountable for water pollution created by their Turkey Point plant. It is FPL's carelessness that created the problem, and they should have to pay the penalties and pay for the clean-up on their dime, not the state's or taxpayers'.

Thank you,  
Mary Wilson

**Subject:** FPL asking to assess customers

Sent from my iPhone. Do not allow Florida Power and Light to assess their customers to correct the salt plume at Turkey Point. They have known about it since 1978 and they should have taken care of it then! Now it will cost much more to fix because of THEIR neglect. Don't put this off on our backs.
