Subject: Tax Payers should not pay for this

Dear Public Service Commission,

Hi my name is Lucas Ortegón. I am an eighth grader at the Cushman Middle School. I read the article on turkey points clean up and I think it is ridiculous. This is their fault this is their mess. My mom works hard! And for Turkey Point's mistake, she has to pay for that?! Not just her, but the people?! Especially the hard working teachers at my school! Eric Salagy is worth billions himself, why can't he pay for it?! It is his mess! Mom always said, if you make a mistake, well you can't expect others to fix it for you. Think about my kids and their kids! They shouldn't have to deal with this. Think of it this way. If you clean this up, that's some good PR for your company. The ocean is our brother. The planet is our brother. Matthew Verse 5 says "Thou shall not kill their brother."

Turkey Point, and FPL needs to solve this mess, because it's their mess.

Thank you for reading,

Sincerely,

Lucas Ortegón

FPL's management of the Turkey Point Nuclear Power Plant's cooling canals is absolutely appalling, especially given all the scientific evidence that contradicts their opinion that they are not causing a saltwater plume that is, and will continue, to contaminate the Biscayne Aquifer. What gives them the right to contaminate the drinking water of millions? FPL should be held accountable for the clean-up of the contamination, as well as being made to install the proper cooling system that has been recommended for quite some time. Being a user of this utility in Key Largo, I am aware of the ultimate question...should we have to pay for this clean-up? I would much rather FPL endure the costs of both clean-up and construction of a proper cooling system, as already mentioned. However, I rather have my rates increase somewhat if it means preventing this monstrosity of a situation from increasing further. My fear is that we don't have time to debate this back and forth, and have FPL burn more precious time fighting this in court, which I am sure that they are bound to do. I want to get this problem fixed, and I want FPL to admit fault in their management of this situation. In an ideal world, FPL would be held accountable and pay for it all, but since this is most likely time we cannot afford to waste, we must get this cleaned up now and do what is needed to prevent this from occurring in the future.

Thank you for your consideration on this matter.

Sincerely,
Laura Bauman

To the Florida Public Service Commission:

I am writing to state my strong opposition to Florida Power and Light (FPL)'s request to pass along to customers the \$200 million cost of cleaning up the Turkey Point canals.

Time after time, the Public Service Commission has approved such requests from FPL, including the cost of hurricane damage repairs. It has become standard operating procedure that FPL's customers rather than share holders bear the burden of FPLs financial obligations.

This case is especially egregious since FPL has known about the pollution in the canals for 30 years!!! I cannot understand why customers are forced to pay surcharges so that FPL can continue to pay dividends of 5% or more to share holders. Why should shareholders be shielded? I urge you to not approve FPL's request.

I hope you will consider my views when making your decision.

Subject: FPL Turkey Point clean up

To Whom It May Concern,

I was made aware of the potential environmental hazard the cooling canals for the Turkey Point nuclear power plant have caused from a Miami Herald article written on November 22, 2017. Based on the facts stated in the article, I believe that FPL should be responsible for the cost of cleaning the canals and fixing the leaks. Back in 1972, they promised they would watch over the plant and canals and make sure the canals worked properly. Their mistake could potentially compromise the water supply. By making this promise, they should have been more aware of whether the canal was working and to fix problems. If FPL is not careful, they will lose customers because everyone will have to move away due to contaminated aquifer. I hope you will take this into consideration in your decision and do not require others to pay for FPL's mistake.

Thank you in advance for your consideration in this matter.

Sincerely,

Nick Dolton

Why should consumers pay for FPL's lack of proper maintenance.

FPL created the problem and let it grow, so let FPL pay for clean up.

If FPL spent more money on solar, and less money on lobbying Tallahassee, we would not be facing this crisis.

Thank you,

Patricia Roth
