

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Megan Owens

Electric Utility Provider : EI801 - Duke Energy

Zip Code : 33713

Category : Other

Comments : Duke Energy asking for storm recovery fees is asinine. They would end up charging customers over \$300 million by the end of the three year period, however a company of their size and in their location should have emergency funds set aside for such scenarios. They admitted themselves that they made mistakes during the recovery process, and now want their customers to pay for those mistakes.
