RE: Response to Audit Report (Control No. 2017-109-1-1)  
dated November 6, 2017  
/ KW Resort Utilities Corp., Docket No. 20170086-SU

Dear Ms. Stauffer:

Please allow this letter to serve as KW Resort Utilities Corp.'s ("KWRU") response to Audit Findings 1 – 18 of the above-listed Audit Report (the "Audit"). The Audit is attached as Exhibit "A", hereto, and each Audit Finding is addressed in this letter in turn:

**Audit Finding 1: Safe Harbor Marina (Account S001)**

Response:

See letter provided on March 21, 2016 from KWRU to the Public Service Commission ("KWRU Letter") attached hereto and incorporated herein as Exhibit "A", which explained this matter. KWRU now recognizes that ultimately the PSC must approve any change to its tariff. However, KWRU and the customer agreed to the revised tariff rate based on the agreement between KWRU and the customer that a substantial increase in development and use at Safe Harbor Marina had occurred. KWRU noticed the PSC of this agreement to revise the rate and received no response from the PSC. KWRU mistakenly believed that the revision to the tariff had been accepted, similar to a developer's agreement for service.

**Audit Finding 2: Sunset Marina (Account SM100)**

Response:

PSC Order PSC-16-0123-PAA-SU ("2016 Order"), was issued March 23, 2016 and did not become effective until the customer notice of the implementation of the new tariff in April 20,

2016. The application of the 2016 Order to Sunset Marina prior to April 2016 by the audit is incorrect. As can be ascertained, Sunset Marina was properly billed after April 2016 when the correct tariff was utilized.

KWRU erroneously continued to charge the Residential Base Facility charge to the 64 residential units from May 2013 to April 2016. KWRU will be refunding the amount of \$3,343.04, plus applicable interest, to the customer. KWRU will provide documentation of such refund once it is remitted.

**Audit Finding 3: Yacht Clubs of America (Account PM002)**

Response: The Audit Finding is based on incorrect factual information. Yacht Clubs of America does not have a 2" meter, but rather two (2) 8" meters. The meters are labeled for fire suppression, but KWRU has confirmed they are both used for general provision of water to the property and return to the KWRU system. Based on two 8" meters, the amount billed is correct.

**Audit Finding 4: Carefree Property (Account SH002)**

Response: This account was billed for a large pool based on the size of the pool and the existence of a common area with pool and bathhouse for use of residents which is not billed as part of the units. The common space and pool are similar in size and use to the large pool at the Key West Golf Club. In the interest of consistency and fairness, KWRU charged this pool in the same manner as the large pool at the Key West Golf Club per its tariff for "large pool." This was discussed in detail with the PSC in 2012 and culminated with this being agreed to be an appropriate methodology. Since that discussion, the only change has been a charge adjustment from "large" to "small" pool based on the Key West Golf Club tariff. KWRU now recognizes the PSC must issue an order approving a revision to the tariff, but believed the communications constituted consent.

**Audit Finding 5: General Service Customers 5/8" Meters**

Response: These customers are all individual mobile home units behind a master water meter. As such, each of the listed customers was billed a BFC for each dwelling unit (behind the single meter) on its premises. Pursuant to KWRU's tariffs prior to the implementation of Original Sheet Nos. 1.0 – 21.0 on April 20, 2016, KWRU billed "All Residential \$17.81 base rate per month, in advance, (includes single family homes, mobile homes, individually metered apartment units)"(underline added). After the change to "per meter" billing, KWRU billed only a single base facility charge per month per customer.

**Audit Finding 6: Ocean Spray Trailer Park (Account OS001)**

Response: Ocean Spray trailer park consists of 14 mobile home units behind a master water meter. As such, Ocean Spray Trailer Park was billed a BFC for each dwelling unit (behind the single meter) on its premises. Pursuant to KWRU's tariffs prior to the implementation of Original Sheet Nos. 1.0 – 21.0 on April 20, 2016, KWRU billed "All Residential \$17.81 base rate per month, in advance, (includes single family homes, mobile homes, individually metered apartment units" (underline added). After the change to "per meter" billing, KWRU billed only a single base facility charge per month per customer.

**Audit Finding 7: Tropic Palm Mobile Home Park (Account TP001)**

Response: Tropic Palm Mobile Home Park is 25 mobile homes behind a master water meter. As such, Tropic Palm was billed a BFC for each dwelling unit (behind the single meter) on its premises. Pursuant to KWRU's tariffs prior to the implementation of Original Sheet Nos. 1.0 – 21.0 on April 20, 2016, KWRU billed "All Residential \$17.81 base rate per month, in advance, (includes single family homes, mobile homes, individually metered apartment units" (underline added). After the change to "per meter" billing, KWRU billed only a single base facility charge per month per customer.

**Audit Finding 8: Meridian West Apartments (Account MW001)**

Response: See KWRU Letter, attached as Exhibit "A".

KWRU's billing system erroneously classified the account as General Service rather than Residential, and the account was incorrectly billed the General Service gallonage rate of \$4.64/1000 gallons rather than the correct Residential gallonage rate of \$3.87 per 1000 gallons.

Upon receipt of proper refund interest rates from the PSC, KWRU calculated the refund amount as \$72,701.12, including interest, and issued a check to the customer with a letter explaining the methodology for the refund on April 6, 2017. The check has been deposited by the customer. Please find attached at Exhibit "B" a copy of the deposited check and letter.

**Audit Finding 9: Fourth Avenue, LLC (Account R090)**

Response: Fourth Avenue, LLC is a mobile home park which has three (3) 5/8" meters. However, only one (1) of the meters returns to the KWRU system and is billable. 4<sup>th</sup> Avenue consists of 17 mobile homes behind this master water meter. As such, Fourth Avenue was billed a BFC for each dwelling unit (behind the single meter) on its premises. Pursuant to KWRU's tariffs prior to the implementation of Original Sheet Nos. 1.0 – 21.0 on April 20, 2016, KWRU billed "All Residential \$17.81 base rate per month, in advance, (includes single family homes, mobile homes,

individually metered apartment units” (underline added). After the change to “per meter” billing, KWRU billed only a single base facility charge per month per customer.

KWRU billed April 2013 to March 2016 at the BFC of \$302.77 (\$17.81 x 17) as the Tariff issued became effective March 30, 2013.

During April 2016, KWRU billed \$29.52 for one (1) 5/8” meter. This amount was prorated to \$31.66 as the monthly charges are at the general service rate, billed in arrears, as the Tariff issued became effective April 20, 2016.

During the period of May 2016 to February 2017, KWRU billed the BFC of \$79.15 per month at one 1” meter. The meter discrepancy was a data input error by an employee who is no longer employed by KWRU. KWRU should properly have billed \$31.66 per month for the actual 5/8” meter.

From March 2013 to April 2016, KWRU erroneously charged the residential base facility rate and the general service consumption rate to the residential units. KWRU will be refunding the difference of \$1,506.51 to the customer. The spreadsheet indicating the billing discrepancy is attached hereto and incorporated herein as Exhibit “C”.

#### **Audit Finding 10: Banyan Grove (Account BG006)**

Response: Banyan Grove is a residential property consisting of 48 multi-family units. The Property was initially billed based on the existence of 48 individual meters; however, FCAA confirmed that there were three approved meters (5/8”, 1”, and 1.5”) on the property. Upon receipt of this information water consumption billing was switched to general service. Upon receipt of proper refund interest rates from the PSC, KWRU calculated the refund amount as \$25,512.91, including interest, and issued a check to the customer with a letter explaining the methodology for the refund on April 6, 2017. The check has been deposited by the customer. Please find attached as Exhibit “D” a copy of the deposited check and letter.

#### **Audit Finding 11: ITNOR-Waters Edge (Account WE002)**

Response: Water’s Edge has a total of sixty-five (65) mobile homes, with fifty-two (52) mobile homes having individual meters. The WE002 account constitutes the thirteen (13) mobile homes which do not have individual meters.

For these thirteen (13) mobile homes, KWRU totals the consumption for the fifty-two (52) individually metered units (capped at 10,000 gallons per unit), and then subtracts the gallons shown on the master meter. For these trailers, consumption is billed at the general service rate of \$6.33 per 1,000 gallons.

Pursuant to KWRU's tariffs prior to the implementation of Original Sheet Nos. 1.0 – 21.0, on April 20, 2016 KWRU billed "All Residential \$17.81 base rate per month, in advance, (includes single family homes, mobile homes, individually metered apartment units" (underline added). After the change to "per meter" billing, KWRU billed only a single base facility charge per month per customer.

During the period of April 2013 to March 2016, KWRU billed the BFC of \$231.53 ( $\$17.81 \times 13$ ) on the 5/8" meter as the issued Tariff became effective April, 2016.

From March 2013 to April 2016, KWRU erroneously billed a residential BFC for each dwelling unit (behind the single meter) on the premises. KWRU will issue a refund to the customer in the amount of \$1,538.23. Calculations underlying the amount of refund are attached hereto and incorporated herein as Exhibit "E".

#### **Audit Finding 12: Effluent Sales**

Response: Effluent sales for the month of April 2016 totaled \$4,389.41 for the Key West Golf Club and Monroe County Detention Center. Additionally, a combined \$799.17 (combined) was billed for effluent testing, prorated as new rates became effective over the course of the billing cycle. This Audit finding provides that the "Utility Amount" of effluent sales is \$4,629.57. This amount was billed only to the Key West Golf Club, and does not constitute total effluent sales.

The Key West Golf Club charge of \$4,629.57 breaks down as follows:

- (1) 5,962,000 gallons billed at a rate of \$0.68/1000 gallons = \$4,054.17; and
- (2) \$1,100.00 testing fee prorated for fifteen (15) days = \$575.40

The gallonage was billed at the \$0.68 rate, because the read date was prior to the effectiveness of the new rate structure. This was done to coincide with the FKAA read dates for the consumption portion of the bill, so no prorations were necessary for individual accounts.

Without reviewing the auditor's work papers, KWRU cannot state the reason for the \$0.83 recalculation. The Audit Finding also states that KWRU is utilizing a \$0.78 rate. This appears to be unfounded, based on the billing methodology illustrated above.

**Audit Finding 13: Boyd's Campground (Account BC001)**

Response: The 395,535 gallons were charged at the \$4.64 per thousand gallons general service rate. KWRU charged a base rate of \$8.76 for the 5/8" meter, prorated for fifteen days. KWRU prorated one 2" meter, three 1.5" meters, and one 5/8" meter at the new rate for twenty (20) days.

Use: \$1,835.28  
Base: \$8.76  
Base: \$498.26  
Total: \$2,342.30 charged

Without reviewing the auditor's workpapers, KWRU cannot state the basis for the calculation that KWRU should have charged \$2,108.22.

In April 2016, KWRU correctly billed the BFC of \$8.76 per month, prorated on the 5/8" meter. The revised Tariff had been issued, and the amount was prorated to avoid overcharging the customer.

**Audit Finding 14: Private Lift Stations for 5/8"**

Response: The April 2016 bill was prorated for base rates as the new tariff, PSC-2016-0123-PAA-SU, was issued by the PSC on April 15, 2016 and KWRU began charging the new (higher) rates on April 21, 2016, the water meter reading date as determined by the Florida Keys Aqueduct Authority (FKAA). Because KWRU began applying the revised rates on April 21, 2016, KWRU was required to use the previous Tariff's lower consumptive rate (\$4.64/ thousand gallons) due to the fact that consumption is billed in arrears and the water was used by the customers in the time period prior to the revised rates being applied by the Utility.

Further, because the new rates were applied by the Utility on the FKAA reading date, the consumptive component of the monthly bill did not require proration. The rates that were charged are accurate according to the applicable Tariffs.

**Audit Finding 15: Harbor Shores**

Response: Prior to the implementation of the current Tariff, Harbor Shores was billed as a residential customer, at \$5.25 per thousand gallons (capped at 10,000 gallons) with a BFC of \$31.66 for 69 units. Effective March 2017, Harbor Shores was classified as a general service customer. As a result of this classification change, in March 2017 Harbor Shores was charged \$1,318.74 based on consumption only. KWRU did not charge a base rate for March, as Harbor Shores had paid its base rate in advance in February, as it was then a residential customer.

**Audit Finding 16: Roy's Trailer Park (Account RTP)**

Response: Roy's Trailer Park is unique in that the vast majority of units have been converted to multi-family (1, 2, 3, 4, and even 6 unit) residences. The owner of the park refuses to verify the number of residences, and no Monroe County or other records indicate the number of units actually in existence.

After several unfruitful discussions with the owner, KWRU determined to proceed pursuant to the PSC Order, effective April 20, 2016. On August 28, 2017, KWRU sent a letter to the owner and offered a settlement, with the settlement amount based on the PSC's stated preference for general service charges based on meter size with a gallonage charge based on water demand in accordance with the Tariff.

The Rate Charge, Original Sheet 13.2, was applied for the period beginning on its effective date, and accounts were adjusted pursuant to that methodology from December, 2015, the month in which KWRU discovered the conversion of single-family into multi-family units, triggering the change in billing.

Upon review of the Tariff and the adjusted calculations, the owner agreed the settlement was adequately supported and that the adjustments made were correct. In October 2017, the owner remitted to KWRU the sum of \$35,215.06, the sum pursuant to the revised calculation.

Because the dispute was resolved and adjustments were made back to December 2015, the bills analyzed should be disregarded. The settlement amount includes additional units other than the duplex, triplex, quadplex, etc. units.

**Audit Finding 17: Flagler Village (Account FV001)**

Response: See KWRU Letter, attached hereto and incorporated herein as Exhibit "A".

KWRU's billing system erroneously classified the account as General Service rather than Residential, and the account was incorrectly billed the General Service gallonage rate of \$4.64/1000 gallons rather than the correct Residential gallonage rate of \$3.87 per 1000 gallons.

Upon receipt of proper refund interest rates from the PSC, KWRU calculated the refund amount as \$43,402.79, including interest, and issued a check to the customer with a letter explaining the methodology for the refund on April 6, 2017. The check has been deposited by the customer. Please find attached a copy of the deposited check and letter, attached hereto and incorporated herein as Exhibit "F".

### **Audit Finding 18: Residential and General Service Customers**

Response:

#### **Residential**

In March 2013, KWRU charged the \$17.81 base rate from the Fourteenth Revised Tariff sheet, as base rate is charged in advance.

Because water consumption is charged in arrears, for March 2013 KWRU applied a gallonage charge of \$4.14 as provided in the Thirteenth Revised Tariff sheet.

In April 2016, KWRU charged the \$31.86 base rate from the Original Sheet No. 13.0 (base rate charged in advanced) and charged a \$3.87 gallonage charge from the Fourteenth Revised Tariff (consumption charged in arrears).

#### **General Service**

The general service 5/8" meter was prorated at \$20.76 for twenty (20) days and \$8.76 base rate for a total of \$29.52.

In March 2017, KWRU charged a \$31.86 base rate from the First Revised Sheet No. 13.0 tariff (base rate charged in advance) and used a \$5.25 gallonage charge from Original Sheet No. 13 (consumption charged in arrears).

General Service customers are charged in arrears. In March 2013, KWRU charged a BFC of \$19.05 and a \$4.96 gallonage charge.

#### **Conclusion**

As can be ascertained, the majority of issues brought forth in the audit report stemmed from tariff sheets which did not have the uniformity that the current tariff sheets provide by billing solely off meter size and gallons. KWRU has endeavored to research each customer to ensure proceeding forward the uniform, simplified tariff sheets based solely on meter size<sup>1</sup> is followed. We hope this resolves the audit to the Florida Public Service Commission's satisfaction.

Sincerely,

Barton W. Smith, Esq.

DOCUMENT NO. 01516-16  
FPSC - COMMISSION CLERK

March 21, 2016

VIA E-MAIL

Mr. Greg Shafer  
Director, Division of Economics  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399

Re: Docket No. 150071-SU – Application for increase in Wastewater rates in Monroe County by K W Resort Utilities Corp.  
Our File No. 34000.01

Dear Mr. Shafer:

The following are K.W. Resort Utilities Corp.'s ("Utility") responses to your Billing Practices Inquiry dated February 18, 2016:

- Safe Harbor Marina is currently being billed a negotiated rate, rather than the approved bulk flat rate. By Order No. PSC-02-1165-PAA-SU, in Docket No. 020520-SU, issued August 26, 2002, the Commission found that the Utility was charging the marina a flat rate for the unmetered bar and restaurant that had not been approved by the Commission and that the Utility was billing discriminatory rates to Safe Harbor. As a result, the Commission authorized a new bulk flat rate.

Response:

Upon submitting Tariff Sheets relating to the 2009 Price Index Increase, the Utility wrote a letter (Exhibit A) to the PSC Director of Economic Regulation, dated April 20, 2009, stating, "tariff sheet #15.5 bulk wastewater with Safe Harbor Marina, the property owner has recognized that the property use has changed substantially since the tariff was originally issued and as such has agreed to continue to pay the amount of \$1,650.67 until such a time as actual water usage can be quantified". Thus, instead of going through a complaint proceeding at the Commission, the parties agreed to an amount. The Commission encourages such settlements, and this letter advised the Commission that a settlement was reached. Further, in this same letter, of April 20, 2009, the Utility asked the PSC "to address any questions or problems regarding this application to Gillian Siefert at 305-294-9578". Utility records show there was no further correspondence with regard to the letter of April 20, 2009.

The Utility openly communicated the situation to the PSC in the correspondence referenced above and the Utility has since hired a State of Florida Licensed Professional Engineer to quantify the actual water usage. It was necessary to determine actual water usage as the property had undergone massive and continuous redevelopment since the Tariff Sheet was instituted originally in 2002. Much of the redevelopment was "under the radar" as on-line records searches for County building permits turned up very little. The Utility is aware that building occurred as the property is adjacent to the wastewater treatment plant and Utility employees have lived on the property, and thus, have witnessed the undocumented development first hand.

Because of this a very thorough site visit was deemed necessary by the Utility and its engineer. The actual water usage was quantified in an Engineering Report that was then provided to Safe Harbor. The study indicated that additional capacity was due to the Utility based on the report, the Utility sent a letter requesting payment for the additional capacity used by the marina. The marina owner admitted in a letter dated April 7, 2015 (Exhibit B) that additional capacity was owed but disagreed with the report as to how much additional capacity is owed. Please note that the portion of the additional capacity charges that is not in dispute, to date, has not been paid to the Utility. As a result of the disagreement, the owner filed a PSC complaint (Inquiry#1183725). The owner's attorney then requested 120 days to allow Safe Harbor to hire a professional engineer to conduct a water usage study on behalf of Safe Harbor. The Utility engaged the legal firm of Friedman & Friedman to represent the Utility and the matter is still pending.

In summary, the Utility commissioned the Engineering Study in April 2013 and every step of the way has been difficult. The Utility routinely does in-house water usage analysis, but in this case the Utility took an extra step and hired a qualified third party to do the analysis to quantify the water usage. The Utility's third party analysis was not acceptable to the Marina and they have brought in a Professional Engineer and an attorney. The owner's Professional Engineer after 210 days still has not provided a water analysis report to the Utility. The Utility continues to work with the customer to resolve the issues. Utility records show that the Utility has had to involve legal counsel on multiple occasions when dealing with this property and the Utility is working to resolve the issue but the customer's actions suggest they are quite happy maintaining the status quo.

- Sunset Marina is currently being billed base facility charges (BFCs) based on an 8" and a 2" meter, the Utility's approved gallonage charge based on water demand, the approved charge for two pools, as well as an additional 64 BFC's based on the number of units behind the meter. According to the Utility's tariff, Sunset Marina should have been billed BFC's based on an 8" and a 2" meter and the gallonage charge based on water demand. Because the pools and 64 units are behind the water meters, no additional charges should have been billed for those facilities.

Response:

Sunset Marina's General Manager, Joanne Alexander, challenged the Utility's billing in October 2012 and engaged the Public Service Commission to resolve this same issue. Sunset Marina is a unique property in that it is actually comprised of 2 different properties, with different ownership, served by a single water service. Both properties are served by the same potable water distribution network with a 2" meter. One of the properties is a 64 unit luxury condominium complex with dock slips and 2 pools. The other property is a commercial marina which includes a ship store, clubhouse, several commercial office spaces, marine engine retailer and repair shop, bath house that serves 139 wet slips, laundry facility, 4 affordable housing units, and more than 100 live aboard boats, etc.

After the PSC received the complaint from the property manager the Utility was contacted and a teleconference was set up to discuss the matter. The teleconference occurred on October 9, 2012 at 10:00AM with the PSC regarding the manner in which the Utility was billing the Marina. The Utility explained to the PSC at this meeting that there were 2 different legal entities that could best be described as mixed use with commercial and residential activities. Because of the complexity of the property the Utility applied Tariff Sheets 15.6 and 15.7 to the properties. (Tariff Sheets Exhibit C)

The Tariff is shown in bold below:

**South Stock Island Marinas Tariff Tenth Revised Sheet #15.6**

**RATE – 6 residential living units at 1 ERC each ..... \$114.33**

**2" Meter that serves ship store, club house, swimming pool bar, restaurant, locker rooms, bathrooms, laundry facilities, businesses located on the property, 100 wet slips served by dockside sewer, 3 boat barns dry storage to accommodate 100's of boats, fitness center, and sauna ..... \$152.42 ( Note that 2" BFC was taken directly off of Tariff Sheet #12.0)**

Therefore for Sunset Marina the Utility applied Tariff Sheet #15.6 as follows:

**RATE - 64 residential living units (Condos) at 1 ERC each ..... \$1,219.52**

**2" Meter that serves 64 unit luxury condominium complex with dock slips and 2 pools and a commercial marina which includes a ship store, clubhouse, several commercial office spaces, marine engine retailer and repair shop, bath house that serves 139 wet slips, laundry facility, 4 affordable housing units, and more than 100 live aboard boats, etc. .... \$152.42 (Note 2" BFC same as on Tariff Sheet #12.0)**

And for the pools Tariff Sheet #15.7 was applied in the exact same manner as for the Key West Golf Club Home Owners Association as the circumstances are identical. And it should be noted that multiple Tariff Sheets were approved for the billing of the Key West Golf Club Home Owners Association property.

The Utility also billed Sunset Marina:

1 large pool per Tariff Sheet #15.7 and 1 small pool per Tariff Sheet #15.7

In the October 9, 2012 teleconference, the PSC acknowledged that the situation is unique and complex. PSC stated that it is unusual to have so many different business entities sharing water service especially 2 completely different properties. The PSC pointed out that the 2" base meter rate is shared by many commercial ventures and that the users are benefiting from this sharing of BFC among the many businesses. The PSC also commented that Tariff Sheet #15.6 incorporates the "non-residential" use of a 2" meter and usage rate for such a meter in a manner that is not unfair or discriminatory. In short the PSC told the Utility it disagreed with Ms. Alexander's claim that the Utility was over billing her.

It was after the October 9, 2012 10AM teleconference when the PSC explained the manner of billing to the customer (Joanne Alexander). With the explanation from the PSC Joanne Alexander then dropped her pursuit of the larger billing issue and focused on a single issue, that being pool size (Exhibit D). Ms. Alexander claimed both of the pools should be billed as small pools. After the Utility engaged the State of Florida Health Department (the agency that regulates pools in the State of Florida) and the PSC, it was determined by the Utility that the Sunset Marina large pool didn't meet the size criteria for a large pool. Therefore, the Utility deemed the pool small, admitted the error, apologized to the customer, and corrected the customer's bill. Every bill where the large pool was billed was corrected to reflect a small pool.

Finally, in May 2013 an 8" Turbo meter was verified to be serving the property in addition to the 2" meter. Upon discovering the new 8" turbo meter the Utility immediately engaged the water utility (Florida Keys Aqueduct Authority - FKAA) to determine if this new meter was a dedicated fire meter or irrigation meter. The Utility does not bill dedicated meters where water isn't returned via the sewer. However, in this case, the meter was not a dedicated fire meter or irrigation meter as verified by FKAA. Therefore the 8" meter was billed the BFC for an 8" Turbo meter (Tariff Sheet #12.0).

- A general service customer with a 6" meter is being billed the BFC for a 5/8" x 3/4" meter for each of the 103 units, while another general service customer with a 5/8" x 3/4" meter is billed the BFC for a 5/8" x 3/4" meter for 49 units. These general service customers should have been billed a BFC for a 5/8" x 3/4" meter and the Utility's approved gallonage charge based on water demand, with no additional charge for the individual units behind the meters.

Response:

The two properties, Meridian West and Flagler Village, are residential properties consisting of multifamily residential units, where each residential unit has a separate water meter. These separate meters are not Florida Keys Aqueduct Authority (FKAA) meters but are private meters installed by the property owners. Prior to 2009 all residential properties were billed a Flat Rate for each residential unit. In 2009, the PSC issued PSC Order No. PSC-09-0057-FOF-SU which required a base rate and a usage charge per 1000 gallons for all residential units, rather than the Flat Rate that had previously been charged. It should be noted that these private residential units are configured in such a way that the Utility would not have a mechanism to disconnect an individual unit for nonpayment should an individual unit owner be delinquent. The only practical way to shut this property off would be by using a shut off valve located in the public right of way that shuts off the entire property from the central sewer system. This situation requires the Utility to set up the residential sewer account with the property owner as opposed to individual unit owners. Thus, while individual units are billed, all bills are sent to the management company.

In these two cases, the Utility utilized these private meters to measure the water consumption of each residential unit. Upon receiving the PSC Order, all residential accounts were set up using the Florida Keys Aqueduct Authority (FKAA) water meter data file and from information provided by customers. The Utility contacted Meridian West's property management company and inquired if each unit was individually metered. The property management response was that each unit is individually metered and there is usage monitoring by an off-site company (Inovonics by Tapwatch). The off-site company verified the units were individually metered, read on a daily basis and the tenants are billed monthly for water consumption. Flagler Village connected after Meridian West and they were set up in the exact same manner.

This owner/management company information was further verified by the FKAA, the FKAA data file lists 103 as number of Meridian West units (Exhibit E). The information obtained regarding Flagler Village similarly indicated 49 units. Therefore, KWRU billed each individual unit a residential base rate, for Meridian West 103 units at \$17.81 per month and for Flagler Village 49 units at \$17.81 per month, per Tariff Sheet #13.0. These accounts were erroneously misclassified in the Utility's new billing system as General Service rather than Residential. Because of the misclassification, they were billed at General Service Gallonage Rate of \$4.64/1000 gal rather than the correct \$3.87/1000 gal Residential Gallonage Rate. As a result of this error, in 2015 Meridian West was over billed \$3.30 per unit per month. In the same manner, Flagler Village was over billed \$4.62 per unit per month. For Calculations and backup information please see Exhibit F. The Utility regrets these errors and will be making a refund with interest of any overpayments. In that regard, please have someone provide me with the monthly interest amounts since 2009.

- Two marinas each with a 2" meter are currently being billed based on an approved bulk flat rate that includes BFCs for a 2" meter and six residential units, as well as a gallonage charge that was erroneously added to the bulk rate tariff as a result of an administrative approval of a 2011 price index.

Response:

Key West Harbor Yacht Club, has a 2" meter and 6 residential units and was formerly named Yacht Clubs of America and this marina is billed per Tariff Sheet#15.6. Stock Island Marina Village is a second marina that is billed a 2" meter and 6 Residential units as it is a mixed use marina which coincidentally also has 6 units residential embedded within the property. This marina is similar to Key West Harbor Yacht Club in its nature as a blend of residential and commercial activities, and substantial redevelopment, and is also billed off of Tariff Sheet#15.6.

As for the gallonage charge that was erroneously added this occurred as a result of a complete redevelopment of the property. This can be explained by looking at the history of the property and looking at the redevelopment that occurred.

In 2009 the property (Key West Harbour Yacht Club) was a marina with an old boat yard that had a number of boats up on jacks so the owners could paint the hulls and perform other maintenance on their boats. There were a handful of people living on the boats on jack stands while they undergoing maintenance. These people could use the bathhouse which was comprised of a single shower, one toilet, and one sink, each, for the men's and women's facilities. There were less than a dozen boats tied up to the seawall that were live aboard boats. There were two houses on the property, 1 mobile home, and 10 houseboats in the basin. There was a small store on the property that sold bottom paint, sand paper, and other maintenance tools and supplies that boat owners needed. There was a small sail shop that sold and repaired canvas and sails. There was an office that in the small store as well, where rents would be collected, etc. The Tariff (Ninth Revised Sheet#15.6 Effective Date of July 31, 2009 lists the amenities as follows:

13 Residential (2 houses, 1 mobile home and 10 houseboats)

16 live aboard boats and 26 non-live aboard boats

1 Bathhouse

3 Commercial Businesses

Total Bulk Rate - \$848.11.

By 2011, when the indexing Tariff was approved, the property had been redeveloped into Yacht Clubs of America which was an international private yacht club with luxury marina properties all over the world. This property has 3 massive boat barns capable of handling 392 boats under roof. There are 103 wet slips that can accommodate up to 110 foot yachts and their crews. There is a full service restaurant and bar (100 seats), with take out, capable of hosting large private weddings/meetings/parties. There is a pool with wait staff to provide food and drinks, a pool bar with patio seating outside of the pool area for 16, and a beach with 20 lounge chairs with wait service provided. There is a Spa and a Gym with men's and women's locker rooms. On the first floor of the clubhouse there are 3 separate offices (575 sq ft.). There is a fuel dock and ship store with 2 piece bathroom with Harbor Master and leasing agent offices adjoining. There are three second story units above the ship store (employee housing) with each unit consisting of bedroom, living room, kitchen, bath and washer and drier in each unit. There are two industrial washing machines for cleaning all of the towels and linens on the property. There are three luxury 2 bedroom 2.5 bath condominiums with full kitchen, living, dining, pool balconies, and lockouts to allow split rentals (lockout allows one bedroom to rent as efficiency). Each unit has a washer and drier. On the crescent

Greg Shafer, Director  
March 21, 2016  
Page 6

dock there is a tiki bar, full men's and women's bath houses, laundry facilities, and ice machines for guests. There are also 24 storage units, and 12 dry racks for boats. There is an Engine Repair service center (6 employee operation) with workshop office and parts warehouse. There is a Boat Services Group Office (600sqft office) includes two piece bath and kitchenette. This property reserved capacity for 175 ERC or 43,750 gallons per day. This property originally was 30.3 ERC (from Tariff Ninth Revised Sheet# 15.6) or 7,575 gallons per day. The redevelopment is 5.8 times bigger than the original property in terms of sewerage capacity. The Tenth Revised Sheet #15.6 reflects the changes that occurred as a result of the redevelopment which created the mixed use property, the 6 residential units are private residences and are each assessed a residential base rate. The 2" meter that supplies water to the entire property is billed at a 2"BFC and the gallonage per thousand gallons is billed per the general service rate.

After redevelopment Tariff Sheet#15.6 was applied and reads:

6 Residential living units at 1 ERC each.....\$114.33

2"Meter that serves ship store, club house, swimming pool bar, restaurant, locker rooms, bathrooms, laundry facilities, businesses located on property, 100 wet slips served by dockside sewer, 3 boat barns dry storage to accommodate 100's of boats, fitness center, and sauna..... \$152.42

Gallonage Charge per 1,000 gallons..... \$4.96

When the 2011 index Tariff Sheet was prepared, the amounts more accurately reflected the amount of wastewater being used as redeveloped. In effect, as a result of the redevelopment, the original Tariff Sheet failed to reflect the actual customer base to which it was purported to apply. The new Tariff Sheets were thus updated. The PSC Staff approved the Tariff Sheets so the Utility began charging those rates.

Stock Island Marina Village was redeveloped after Key West Harbor Yacht Club and is also billed a 2" BFC for their meter and gallonage per thousand per the rate per Sheet #15.6. The billing began in September 2013 for Stock Island Marina Village upon their redevelopment (Phase I completion).

The billing amiguities are the result of the unique rate structures due to the unique characteristics of a number of the customers which arose out of the 2009 rate case. With conclusion of the current rate case, the rate structure has been simplified, which will eliminate any billing issues prospectively. Should you or Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

MARTIN S. FRIEDMAN

Re: Notice of Intent 2009 Price Index Increase

Dear Mr. Devlin:

Enclosed please find Price Index Calculations, copies of 2007 and 2008 Ad Valorem Tax Statements and Tariff Sheets, Affirmation, Statement of Quality of Services (with attachments) and Notice to Customers as part of our Price Index Application package. We request rate increase effective June 30, 2009.

Please note that we request to abandon/void Rate Sheet No. 15.6 as Peninsular Marina has been sold and undergone substantial development and changes, and is now known as Key West Harbor Yacht Club. As such, we will be billing them using the General Service and Residential Service Rate Schedules, as applicable. Also, please be advised that regarding our tariff sheet #15.5 bulk wastewater with Safe Harbor Marina, the property owner has recognized that the property use has changed substantially since the tariff was originally issued and as such has agreed to continue to pay the amount of \$1,650.67 until such a time as actual water usage can be quantified.

Thank you for your assistance in this matter. Any questions or problems regarding this application should be addressed to Gillian Seifert at 305-294-9578.

Sincerely,

  
William L. Smith, Jr.  
Chairman of the Board

KW Resort Utilities Corp.  
6630 Front Street  
Key West, FL 33040

Dear Chris:

We received one page on the engineering report. Surely this is not the whole report. I am now insisting on a copy of my whole file from you along with the records showing the impact fees paid prior to you taking over the sewer company. You have only supplied partial paperwork and based on this your engineering firm has thrown out the parameters the public commission set up years ago.

In addition, you have failed to give me the \$10,000 credit we paid to the prior owner of the sewer company. After talking to PSC, they tell me that you must charge by your tariff. We deliver all our sewerage to you and have metered this over the last few months. You can't charge me 20% over the tariff as stated in our last meeting if we pay you by the bulk sewer rate. The Hogfish has a 150 seat license they were totally full with a waiting line last week and we counted 138 people in the restaurant. Your report is inaccurate.

If you will not give us a complete copy of the report stipulating all charges for the impact fees, I am sure you will submit it to the PSC. Since Bart Smith is my counsel and yours I am not seeking legal counsel at this time. I will get a date with the PSC, like I did last time, and sit down to figure this out.

On January 30, 2015 our meter was installed and read zero. On April 7, 2015 the meter reads 702,339 gallons for a total of 68 days, for a total of 10,328 gallons per day delivered to your facility. The marina is 100% full, this is season for the bar and restaurant, and this is the busiest high point of the season. This translates into 41.314 EQR or \$111,547.00 of which \$13,500.00 was previously paid by Bama, \$43,068.09 was previously paid by SHP and \$10,000 was paid to previous owner of the utility company, for a total of \$66,568.09 and a difference of \$44,978.91.

Gallons are gallons, and gallons represent flows. Tariffs represent approved charges where applicable. These tariffs are signed by you, the bulk rate tariff is signed by you. I do not believe we are going to be able to resolve this without the help of the Public Service Commission.

Sincerely,

  
Joe O'Connell

Lydia,

Joanne Alexander called Bill Smith, who is the majority shareholder and is the Chairman of KWRU's Board of Directors, this afternoon. She told him she is willing to pay for everything but had an issue with small vs large pool and that maybe there was a small math error in our bill (bill is calculated by billing software but is only as good as the data put in). She told Bill she should be billed for two small pool instead of one large and one small. I will call her first thing Monday morning to see if we can't solve the math issue and we can discuss the pool issue as well. So we are now miles closer to resolution than we were this morning. I will continue to keep you in the loop.

**To:** 'Chris Johnson'; Lydia Roberts (LRoberts@PSC.state.fl.us)  
**Subject:** Oct 17 Sunset and RFI update

Lydia,

I called Joanne Alexander right after you and I spoke Monday afternoon and after speaking with Joanne I believe the only issue we have yet to resolve is the small vs. large pool which we will finalize once we have the definition of what a large pool is in terms of gallons. In an email she sent me she states that the pool (pool + spa) that is categorized as large is 20,700 + 1,820 = **22,520 gallons** according to records she has of Health Department inspections. If you can help with the definition of large pool that would move the matter forward and then there would be nothing in the way of the check being cut.

And to update you, I have a teleconference this afternoon with the law firm where we will discuss the request you made for additional information. If they do not object to me providing the information I will be sending it to you later today.

Thank you - Chris

Joanne,

Thanks for taking my call earlier. After further consideration KWRU will recognize both of your pools as small. There is a difference of \$79.65 between a large and a small pool and this was charged on 10 monthly bills so your CREDIT is (\$79.65 X 10) \$796.50. So using the attached Account History and Aging reports the monies owed are:

\$27,071.96 (AC#SM100)  
\$76.83 (AC#S106)  
\$21.03 (AC#S107)

---

\$27,169.82  
Less Pool CREDIT \$796.50

**Total Owed \$26,373.32 This pays all monies up to August 31, 2012.**

We are currently investigating the FCAA water meter readings that were transmitted to us and this is why the September 30, 2012 bill is delayed. FCAA has implemented "combined billing" and has also physically changed out meters. You have probably seen this on your water bill recently. This is new and the FCAA staff is a bit confused when we ask for specific information relating to the meter readings. Even when FCAA staff is not confused it often requires them checking into things and then calling us back at a later time. The minute we resolve the meter reading issues with the FCAA we will get you the September bill. In the interim we very much appreciate your patience. Should you have any questions please contact me.

## EXHIBIT

### Meridian West 2015

#### As Billed 2015

Avg Monthly Consumptive = (total 2015 consumptive water/12 months) = gal/month  
= 5,291,040 / 12 = 440,920 gal/month

(monthly gal expressed in thousand gal X General Service Rate/1000 gal) = Total Monthly Usage  
(440.92 thousand gallons X \$4.64/1000 gallons) = \$2,045.87 Monthly Usage for all 103 Units

#### RE-calculated using Residential Gallonage Charge

(monthly gal expressed in thousand gal X Residential Rate/1000 gal) = Total Monthly Usage  
(440.92 thousand gallons X \$3.87/1000 gallons) = \$1,706.36 Monthly Usage for all 103 Units

The Difference is an overcharge of \$339.51 (\$2,045.87 - \$1,706.36) which works out to \$3.30 per unit per month (\$339.51/103 units).

### Flagler Village 2015

#### As Billed 2015

Avg Monthly Consumptive = (total 2015 consumptive water/12 months) gal/month  
= 3,528,600/12 = 294,050 gal/month

(monthly gal expressed in thousand gal X General Service Rate/1000 gal) = Total Monthly Usage  
(294.050 thousand gallons X \$4.64/1000 gallons) = \$1,364.39 Monthly Usage for all 49 Units

#### RE-calculated using Residential Gallonage Charge

(monthly gal expressed in thousand gal X Residential Rate/1000 gal) = Total Monthly Usage  
(294.050 thousand gallons X \$3.87/1000 gallons) = \$1,137.97 Monthly Usage for all 49 Units

The Difference is an overcharge of \$226.42 (\$1,364.39 - \$1,137.97) which works out to \$4.62 per unit per month (\$226.42/49 units).
