

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Howard Phelps

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 34231

Category : Other

Comments : With the increase in solar panels around the country, we need to focus on how to improve the availability as well as being able to sell back the power to our providers. By having more homes and buildings with solar panels we can greatly reduce the number of outages during storms and it is safer from a state security standpoint as it would reduce the effect of having a local power plant taken out by terrorism. Solar energy can be used with other power sources and solar seems like a very good choice for the sunshine state known as Florida.
