

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Kenneth Tremblay

Electric Utility Provider : EC911 - Sumter Electric Cooperative, Inc.

Zip Code : 34736

Category : Other

Comments : I found it ridiculous that because I am required to be on the grid. Despite the fact I have 18 solar panels on my roof during the 5 days my power was off I had no power I couldn't even power my refrigerator or charge my cell phone. The power was off for 5 days and I am not allowed to use the solar power coming from my 18 panels to keep my food from spoiling and ultimately throwing it out because nobody had ice in town. Than God I had propane in my gas grill that the electric company can't stop me from using because if ridiculous rules about solar power and some deal the electric company has mm are with someone on Tallahassee . I think every new home in Florida should be required to have solar panels and the electric company's should not be stopping that from happening. If they want a piece of this then they need to evolve and start installing these systems and maintaining them etc on people's homes.
