Comments : I am writing to ask that you do everything in your power to ensure the use of more resilient energy technologies, like solar and storage to keep the lights on next time a major storm devastates a community such as mine.

We can't afford more business-as-usual, and it's time to invest in a safer, more resilient power grid that includes more clean energy options like solar and battery storage to provide power during outages. Our utilities can and must do better!

Thank you
