

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Robert Posch

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 33305

Category : Power restoration time

Comments : Hurricane Irma showed again how undependable the power grid is when a big storm hits. Our roof membrane was torn off, and water intruded into the condos below. We were unable to remove water, and start process to dry out units, resulting in mold. This delayed renovation significantly.

Neighbors on the Beach )Fort Lauderdale) have solar and were immediately able to generate power after the storm. To me this seems like the smart way forward. I think the utilities need to invest in more solar and batteries near our neighborhoods. Or make it easier for customers to buy their own equipment and be able to use it when the grid goes down. Those kinds of technology should be used wherever they can to prepare for hurricanes. We need to make sure FPL is building the grid with modern technology and clean energy to make it more dependable, not just rebuilding the same old power lines that keep going down when we need them the most.
