Comments : Increasing the use of solar energy in FL: We should be leading the nation and be examples to other states as to the many uses of solar energy. Our local companies should be encouraging home use, giving rebates; buying back excess energy. There is no reason why we, the SUNSHINE STATE, is not the leader in theses innovations. I see new construction going on all the time, and not one bit of solar technology is being utilized. What a waste of NATURAL RESOURCES!
