

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Thomas Woodson

Electric Utility Provider : EI801 - Duke Energy

Zip Code : 34761

Category : Other

Comments : Preventive maintenance is what I learned in the Army. Yes roofs get damaged in hurricanes but not the tens of thousands that lose electricity. If those roofs had solar panels they would be able to have some power.

The best source of energy in the Sunshine State is the sun. How hard is that to understand. When we tax payers start spending trillions on levys to keep our state from flooding it will be too late to go to solar, wind and water clean energy.

Laws and rules encouraging clean energy and laws requiring a specific hugh amount of investment in clean energy by energy companies is needed.
