

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Jean Ann Marwick

Electric Utility Provider : E1802 - Florida Power & Light Company

Zip Code : 32114

Category : Other

Comments : We live in the sunniest State of the entire USA and yet the power companies do not see fit to use solar power to increase the power of the grid. It could be so much more efficient and so much cheaper for us all. It is simply not right that when a storm comes through many people lose their power for long stretches of time. Here in Daytona where I live we were very lucky during Irma and did not go without power for long but I know that other areas were impacted more severely. Please start using solar and help Floridiand keep their lights on
