

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Chris L Bromfield

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 33431

Category : Other

Comments : Both emergency (gas) generators and PV installations are required to prevent back feeding the electrical grid in the event of a power outage from the electric utility. When my PV system was installed, a certified electrician, the city of Boca Raton inspectors and FPL inspected my system to be in compliance with all safety concerns. I plan to install a battery backup system for my home this year. Prohibiting me from supplying my home with electrical power from my PV system in the event of a power outage is an unwarranted overreach.
