Carlotta S. Stauffer, Commission Clerk Office of Commission Clerk Florida Public Service Commission 2540 Shumard Oak Boulevard Tallahassee, FL 32399

RE: Docket No. 20160101-WS; Application for an increase in water and wastewater rates in Charlotte, Highlands, Lake, Lee, Marion, Orange, Pasco, Pinellas, Polk, and Seminole Counties by Utilities, Inc. of Florida <u>Our File No. 30057.227</u>

Dear Ms. Stauffer:

As required by Order No. PSC-2017-0361-FOF-WS at p. 80, Utilities, Inc. of Florida ("UIF") is directed to file a report with the Commission stating the completion date of all proforma projects approved in the Order along with supporting documentation showing that the projects have been completed. Enclosed are each of the 46 proforma projects showing the project completion date for those projects that are closed, the scheduled completion date for any open projects, the addition to rate base for each project as noted in the Order, and the costs incurred for each project through March 31, 2018.

The unusual heavy rains that occurred during the summer months of 2017 followed by a series of hurricanes, including Hurricane Irma that caused widespread damage throughout the UIF service territory, resulted in the delay to some of the capital projects. Not only was there additional time required for restoration to be completed but the damage also resulted in the temporary redeployment of contractors and equipment to other priorities. That said, the total proforma project costs approved in the rate case totaled \$34.475 million and the total spent through March 31, 2018 was \$35.263 million. The actual costs here and in the detail project cost below include any interest during construction and capitalized time that was charged to the project unless otherwise noted.

For those projects that required the issuance of a DEP construction permit, the clearance documentation is provided as an attachment that references the applicable Capital Project Number (CP#).

For those projects where no permit was applicable, the project completion date reflects the date that the project was closed out after posting all costs.

Should you or Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

/s/ Martin S. Friedman

- 1. <u>Cypress Lakes WTP Hydro Tank #1, no CP#:</u> The relocated tank was placed into service on April 30, 2017. The addition to rate base identified in the Order was \$25,732. The total project cost was \$25,732.
- 2. <u>Cypress Lakes Sediment Removal, CP# 2016075</u>: Work was completed on September 30, 2016. The \$45,918 is deferred maintenance activity that is being amortized over five years.
- 3. <u>\*Eagle Ridge WWTP EQ Tank & Headworks, CP# 2017025</u>: The equalization tank and static screen were placed into service on March 22, 2018. The new field office trailer is on site with installation to be done by April 20, 2018 following the demolition and disposal of the two original EQ tanks. The project is expected to close on April 30, 2018. The project's construction schedule was delayed by four weeks due to the engineer of record having to redesign the tank and headworks to add elevation data and flange connections missing from the original plans; approximately 12 weeks due to the federal government mandating that the tank manufacturer prioritize the delivery of a tank to the government ahead of our prior order; and another eight weeks due to localized flooding and site cleanup caused by Hurricane Irma. Through March 31, 2018, the project's cost is \$952,727. The additional rate base identified in the order is \$937,445.
- 4. <u>Labrador WWTP Sediment Removal, no CP#</u>: This deferred maintenance project was completed on September 23, 2016 at a total cost of \$61,137 that is being amortized over five years.
- 5. <u>\*LUSI Lake Groves Sludge Dewatering Equipment, CP# 2015018</u>: The project was completed and placed into service on July 3, 2017 after completing modifications to the original design used in the pilot test period. The additional rate base as identified in the Order is \$244,295. The total equipment cost was \$247,563. With the addition of IDC and CT, the total project cost was \$339,984.
- \*LUSI Oswalt Road Water Main Relocation, CP# 2016103: The project was completed on December 31, 2016. The addition to rate base in the Order is \$181,400. The total project cost was \$192,130.
- <u>LUSI SCADA System, CP# 2014072</u>: The project was placed into service on July 1, 2016. The addition to rate base was \$458,056. The total project cost was \$599,790.
- 8. <u>\*LUSI TTHM & HAA5 Study, CP# 2015175</u>: The study was completed on November 19, 2016. The addition to rate base identified in the Order was \$79,250. The total project cost was \$80,709.
- 9. <u>LUSI Engineering TTHM & HAA5 Remediation, CP# 2016133</u>: The project completion date was extended to May 2018 reflecting the addition of a second pilot test to examine the efficacy of using chlorine dioxide as a pre-treatment method at the Lake Groves WTP and Lake Louisa WTP, which offers the potential for significantly reducing actual construction and operating costs. The addition to rate base identified in the Order is \$330,832. To date, the engineering services provided on the project total \$458,714. Total project cost through March 31, 2018 is \$512,506.
- 10. <u>LUSI US 27 Utility Relocations, CP# 2015083 and CP# 2016009</u>: Construction was completed on November 30, 2017. The addition to rate base was \$1,734,320.

Engineering services totaled \$73,931 as identified under CP# 3015083. Construction costs totaled \$1,921,754. The combined total of the coupled CP's was \$1,995,685 (\$73,931 + \$1,921,754).

- 11. <u>\*Longwood Church Avenue Utility Relocations, CP# 2016088</u>: The new facilities were placed into service on January 23, 2018. The remaining project item not yet completed is the excavation and removal of approximately 100 LF of the old force main by the City of Longwood's contractor, which is expected to be done by May 31, 2018. The addition to rate base identified in the Order was \$253,524. The total project cost to date is \$259,023.
- Longwood Groves I&I Study, no CP#: The project was completed on December 31, 2016. The addition to rate base identified in the Order was \$49,315. The total project cost was \$49,314
- 13. Longwood Groves I&I Remediation, CP# 2017026: The project was completed on January 31, 2018. The addition to rate base in the Order was \$273,745. The total project cost was \$335,446.
- 14. <u>\*Mid-County Electrical Improvements and Generator Replacement, CP# 2016085:</u> The project was substantially completed on January 16, 2018. Work not yet completed includes some minor site restoration that is to be completed by April 30, 2018 at which time the final invoice will be paid that includes retainage. The addition to rate base identified in the Order was \$1,158,120. The total project cost through March 31, 2018 is \$1,300,225.
- 15. <u>Mid-County Field Office, no CP#:</u> The project was completed July 8, 2016. The addition to rate base in the Order was \$78,429. The project construction cost was \$80,450.
- 16. <u>Mid-County Flow Study, CP# 2015134:</u> The project was completed on December 31, 2017. The addition to rate base was \$62,760. The total project cost was \$94,841.
- 17. <u>Mid-County Excess I&I Remediation, CP# 2017051</u>: The project was completed on December 29, 2017. The addition to rate base was \$118,031. The total project cost was \$117,190.
- Mid-County Methanol Pumps and In-Line Nutrient Analyzers, CP# 2016089: The project was completed on March 1, 2017. The addition to rate base in the Order was \$101,833. The total project cost was \$87,485.
- 19. \*Mid-County US Highway 19 Utility Relocation, CP# 2016032: The project was completed on May 31, 2017. The addition to rate base was \$194,271. The total project cost was \$245,872.
- 20. \*Pennbrooke WTP Electrical Improvements, CP# 2017005: The equipment went into use on March 31, 2018. The addition to rate base in the Order was \$436,617. The total project cost through March 31, 2018 is \$389,663. Payment of retainage and demobilization costs will occur in April.
- 21. <u>Sandalhaven Placida Road Utility Relocation, CP# 2011047 and CP# 2017010:</u> The project was completed on January 31, 2018. The addition to rate base in the Order was \$200,557. The total project cost was \$49,002 + \$462,406 = \$511,408.
- 22. <u>\*Sanlando Autumn Drive WM Replacement, CP# 2016087</u>: The project was completed on January 31, 2017. The addition to rate base was \$98,970. The total project cost was \$99,896.

- 23. <u>Sanlando Lift Station RTU Installation, CP# 2017001</u>: The project's completion was delayed due to the lack of performance by the contractor who went out of business midway through the project. The contract was terminated and another qualified contractor was selected to complete the project. Approximately 90% of the work has been done. The project will be completed and closed out by April 30, 2018. The addition to rate base in the Order was \$591,200. The total project cost through March 31, 2018 is \$625,187.
- 24. <u>Sanlando Markham Woods Rd. Utility Relocates, CP# 2016041</u>: The project was completed on July 31, 2016. The addition to rate base in the Order was \$65,900. The total project cost was \$64,434.
- 25. <u>\*Sanlando Myrtle Lake Hills Water Mains, CP# 2016057</u>: The project was completed on January 30, 2017. The addition to rate base in the Order was \$60,000, which reflects the portion of the project that benefit the existing customers. The total project cost was \$705,165.
- 26. <u>Sanlando –Inflow & Infiltration Study and Remediation, Phase 2, CP# 2015097</u> <u>and CP# 2016074:</u> The I&I Study was competed on July 1, 2016. The project to remediate the deficiencies identified in the I&I Study was completed on January 31, 2017. The addition to rate base for these two projects was \$1,820,225. The total project cost was \$156,824 + \$1,771,910 = \$1,928,734.
- 27. <u>Sanlando Shadow Hills Flow Diversion, CP# 2017011</u>: The project's completion has been delayed due to the impact of Hurricane Irma, site plan approval by Seminole County, and the provision of electric service to the new lift station by Duke Energy Florida. Approximately 95% of the new facilities have been completed. They will be placed into service on or before May 31, 2018. The addition to rate base in the Order was \$7,361,078. Through March 31, 2018, the project cost is \$6,834,801. The majority of the remaining project cost reflects 5% retainage that will be paid out once the new equipment and field office are placed into service in May.
- 28. Sanlando Well 2A and Lift Station A-1 Electrical Improvements & Generator Install, CP# 2016067: The project was substantially completed and placed into service in August 2017. The project's completion date was delayed due to the SCADA equipment vendor going out of business in 2017. Another qualified contractor was selected who will complete the remaining work by May 31, 2018. The addition to rate base in the Order was \$343,437. The total project cost through March 31, 2018 is \$354,444.
- 29. <u>Sanlando Wekiva WWTP Rehabilitation, CP# 2016058:</u> The project was delayed due to the impact of heavy rains during the summer and Hurricane Irma in September. It is nearing completion with a scheduled placed in-service date of the third and final treatment train of May 30, 2018. The addition to rate base in the Order is \$1,826,204. The total project cost through March 31, 2018 is \$1,853,152.
- 30. <u>Tierra Verde 401 8<sup>th</sup> Avenue Gravity Sewer Main Replacement, Phase 2, no CP#:</u> The project was completed on March 3, 2016. The addition to rate base was \$84,673. The total project cost was \$84,673.
- 31. <u>\*UIF Crescent Heights WM Replacement, CP# 2016094:</u> The project was delayed by five months due to Orange County requiring that the project include the installation of standard fire hydrants, which required substantial revision to the

plans and resubmittal to the county for approval. A portion of the project was cleared for service by FDEP on March 29, 2018. The project is approximately 50% completed with a scheduled placed-in-service date of June 30, 2018 for the last section of the project. The addition to rate base in the Order was \$1,805,518. Through March 31, 2018, the project cost is \$1,051,670.

- 32. <u>\*UIF Orangewood/Buena Vista WM Replacement, CL# 2016102:</u> The last portion of the Buena Vista section was completed on February 5, 2018 and placed into service. One section of the Orangewood portion of the project was completed on March 8, 2018. The remaining portion of the Orangewood system will be placed into service before May 15, 2018. The project was delayed by Hurricane Irma and Pasco County initiating a repaving project that generated conflicts with our plans. The addition to rate base in the Order was \$2,161,993. Through March 31, 2018, the total project cost is \$2,187,512.
- 33. <u>\*UIF Summertree Well Abandonment, CP# 2017006</u>: The project was completed on May 31, 2017. The addition to rate base in the Order was \$181,726. The total project cost was \$194,790. A reimbursement of \$18,000 was provided by SWFWMD as an offset to the well abandonment costs resulting in a net project cost of \$176,790.
- 34.<u>UIF Lake Tarpon WM Replacement, CP# 2016091:</u> The project was completed on November 30, 2017. The addition to rate base in the Order was \$1,218,146. The total project cost was \$1,318,001.
- 35. <u>UIF Electrical improvements at Little Wekiva and Jansen WTPs, CP# 2016068:</u> The project was substantially completed and placed into service in August 2017. The project's completion date, however, was delayed due to the SCADA equipment vendor going out of business in 2017. Another qualified contractor was selected who will complete the remaining work by May 31, 2018. The addition to rate base in the Order was \$221,495. Through March 31, 2018, the project cost, inclusive of engineering services is \$239,095.
- 36. <u>UIF Eng-Seminole & Orange County WM Replacements, CP# 2015082:</u> The project was completed on September 1, 2016. The addition to rate base in the Order was \$57,047. The total project cost was \$63,063.
- 37. <u>\*UIF Bear Lake WM Replacement, CP# 2016093</u>: The project is approximately 80% complete with a scheduled placed-in-service date of May May 1, 2018. The addition to rate base in the Order was \$1,495,127. Through March 31, 2018, the project cost is \$1,250,377.
- 38. <u>UIF Crystal Lake WM Replacement, CP# 2016095</u>: The project is approximately 50% complete with an expected place-in-service date of June 1, 2018. The addition to rate base in the order is \$1,585,933. Through March 31, 2018, the project cost is \$895,688.
- 39. <u>\*UIF Little Wekiva WM Replacement, CP# 2016096:</u> The project was completed on March 31, 2018. The addition to rate base in the Order was \$521,681. The total project cost was \$570,707.
- 40. <u>\*UIF Northwestern FM Replacement, CP# 2017004:</u> The project was completed on November 3, 2017. There was no addition to rate base in this docket. The project cost of \$715,809 will be included in the next rate filing.
- 41. UIF Oakland Shores WM Replacement, CP# 2016097: The project was

completed on March 31, 2018. The addition to rate base in the Order was \$1,571,701. The total project cost was \$1,669,480.

- 42. <u>UIF Phillips WM Replacement, CP# 2016098</u>: The project is approximately 50% complete. The scheduled placed-in-service date is June 1, 2018. The addition to rate base in the Order was \$1,188,247. Through March 31, 2018, the project cost is \$430,941.
- 43. <u>\*UIF Ravenna Park WM Replacement, CP# 2016099:</u> The project was completed on March 31, 2018. The addition to rate base in the Order was \$2,161,808. The total project cost is \$2,250,807.
- 44. <u>\*UIF Ravenna Park/Crystal Lake Interconnect and WTP Improvements, CP#</u> <u>2016080:</u> The project was completed on September 9, 2016. The addition to rate base in the Order was \$707,320. The total project cost was \$737,360.
- 45. <u>C4500 Kodiak Truck Upgrade, no CP#:</u> The project was completed on September 16, 2016. The addition to rate base in the Order was \$46,157. The total project cost was \$46,157.
- <u>UIF GIS Mapping Services, CP# 2016025</u>: The project was completed on July 7, 2017. The addition to rate base in the Order was \$244,321. The total project cost was \$282,254.

From:Julian Coto < Julian@Excelengineers.com>Sent:Tuesday, March 27, 2018 2:39 PMTo:Mike Wilson; 'Colleen Kleist'Cc:Patrick Flynn; Julian@Excelengineers.comSubject:Eagle Ridge Clearance

Hello again Colleen;

Please be advised that I spoke with FDEP today about the Clearance with regard to Eagle Ridge.

I was told that they don't issue a formal response to the Clearance. It was confirmed that they did receive it and by that act and based on our certification it is Cleared.

Please resume making the necessary connections in order to bring the new Flow Equalization Basin online, removing the old ones and restoring the site.

# REQUEST FOR APPROVAL TO PLACE A DOMESTIC WASTEWATER COLLECTION/TRANSMISSION SYSTEM INTO OPERATION

#### PART I - INSTRUCTIONS

- This form shall be completed and submitted to the appropriate DEP district office or delegated local program for all collection/transmission system projects required to obtain a construction permit in accordance with Chapter 62-604, F.A.C.
- (2) Newly constructed or modified collection/transmission facilities shall not be placed into service until the Department has cleared the project for use.
- (3) All information shall be typed or printed in ink, and all blanks must be filled.

## PART II - PROJECT DOCUMENTATION

(1) Collection/Transmission System Permittee

Name Patrick C. Flynn	Title Vice President
Company Name Utilities Inc. of Florida	
Address 200 Weathersfield Avenue	
City Altamonte Springs	State FL Zip 32714
Telephone 866-842-8432 Fax	Email pcflynn@uiwater.com

#### (2) General Project Information

DEP Fo Effectiv

Project Name	Northwestern Avenue Utility Relocation		
Construction Pern	nit No. 0134627-027-DWC/CG	Dated	Japuary 31, 2017

Is the entire project included under the collection/transmission system permit substantially complete? Yes No (If approval is being requested to place a portion of the project into operation, attach a copy of the site plan or sketch that was submitted with the application showing the portion of the project which is substantially complete and for which approval is being requested.)

July 1, 2017

Description of Portion of Project for Which Approval is Being Requested (including pipe length, total number of manholes and total number of pump stations) Entire project, 1,729 LF of 6-inch PVC, and 2,768 LF of 6-inch HDPE

Expected Date of Connection to Existing System or Treatment Plant

#### (3) Treatment Plant Serving Collection/Transmission System

Name of Treatment P	lant Serving Project	Altamonte Springs Regional WF	RF
County Seminole		City Altamont	e Springs
DEP permit number	FL 0033251	Expiration Date	08/26/2017 FINAL
тп 62-604.300(8)(b) e November 6, 2003	RECEIVED AUG 2 1 2017 DEP Central Dist	Page 1 of 3	For Department Use Only 8/29/2017 By CHM CLEARED FOR USE

#### PART III - CERTIFICATIONS

#### (1) Collection/Transmission System Permittee

I, the undersigned owner or authorized representative\* of Utilities Inc. of Florida certify that the engineer has provided us a copy of the record drawings for this project and if there is not already an existing applicable operation and maintenance (O&M) manual, one has been prepared for the new or modified facilities.

Also, I certify that, if we will <u>not</u> be the owner of this project after it is placed into service, we have provided a copy of the above mentioned record drawings and a copy of the above mentioned O&M manual, if applicable, to the person or system that will be the owner of this project after it is placed into service.

Signed	Saturd CH	m	Date	6/16/17
Name	Patrick C. Flynn	1	Title	Vice President
* Attach a	letter of authorization.			w . Waaraanaa

(2) Owner of Collection/Transmission System After it is Placed into Service

I, the undersigned owner or authorized representative\* of Utilities Inc. of Florida certify that we accept the project as constructed and will be the owner of this project after it is placed into service. I agree to report any abnormal events in accordance with Rule 62-604.550, F.A.C. and promptly notify the Department if we sell or legally transfer ownership of the collection/transmission system. Also I certify that we agree to operate and maintain the facilities in accordance with the provisions of Chapter 403 Florida Statutes (F.S.) and applicable Department rules and that we have received a copy of the record drawings and O&M manual for this project and that these record drawings and O&M manual are available at the following location which is within the boundaries of the district office or delegated local program permitting the collection/transmission system:

* Attach a letter of authorization.	

#TIE-W AND OPERATION TO OCCUR ONCE CLEARANCE RECEIVES

#### (4) Professional Engineer Registered in Florida

1.

I, the undersigned professional engineer registered in Florida, certify the following:

- that this project has been constructed in accordance with the construction permit and engineering plans and specifications or that, to the best of my knowledge and belief, any deviations from the construction permit and engineering plans and specifications will not prevent this project from functioning in compliance with Chapter 62-604, F.A.C.;
- that the record drawings for this project are adequate and include substantial deviations\*\* from the construction permit and engineering plans and specifications;
- that a copy of the record drawings has been provided to the permittee and to the wastewater treatment facility serving the collection/transmission system;
- that the O&M manual for this project has been prepared or examined by me, or by an individual(s) under my direct supervision, and that there is reasonable assurance, in my professional judgment, that the facilities, when properly maintained and operated in accordance with this manual, will function as intended; and
- that, to the best of my knowledge and belief, appropriate leakage tests have been performed and the new or modified facilities met the specified requirements.

This certification is based upon on-site observation of construction conducted by me or by a project representative under my direct supervision and upon a review of shop drawings, test results/records, and record drawings performed by me or by a project representative under my direct supervision.

The following is a description and explanation of substantial deviations\*\* from the construction permit and engineering plans and specifications for the substantially completed portion of this project. (Attach additional sheets if necessary.)

The 6-inch force main was installed on the east side of Durango Way, instead of the west side as initially designed. The original design called for crossing Durango Way twice. Once in construction, it was determined that crossing of Durango Way was not necessary. This deviation is shown on Sheets 5 and 6.

Name Nicole E. Quinby, P.E.	Florida Registration No.	73789

Address 3660 Maguire Boulevard Suite 200		
City Orlando	State FL	Zip 32803
Telephone 407-409-7005 Fax	Email nicole.quinby@k	1

\*\* Substantial deviations are construction deviations greater than 10% from plans and specifications and any deviations which fall below minimum standards established in Rule 62-604, F.A.C.

#### (4) Professional Engineer Registered in Florida

I, the undersigned professional engineer registered in Florida, certify the following:

- that this project has been constructed in accordance with the construction permit and engineering plans and specifications or that, to the best of my knowledge and belief, any deviations from the construction permit and engineering plans and specifications will not prevent this project from functioning in compliance with Chapter 62-604, F.A.C.;
- that the record drawings for this project are adequate and include substantial deviations\*\* from the construction permit and engineering plans and specifications;
- that a copy of the record drawings has been provided to the permittee and to the wastewater treatment facility serving the collection/transmission system;
- that the O&M manual for this project has been prepared or examined by me, or by an individual(s) under my direct supervision, and that there is reasonable assurance, in my professional judgment, that the facilities, when properly maintained and operated in accordance with this manual, will function as intended; and
- that, to the best of my knowledge and belief, appropriate leakage tests have been performed and the new or modified facilities met the specified requirements.

This certification is based upon on-site observation of construction conducted by me or by a project representative under my direct supervision and upon a review of shop drawings, test results/records, and record drawings performed by me or by a project representative under my direct supervision.

The following is a description and explanation of substantial deviations\*\* from the construction permit and engineering plans and specifications for the substantially completed portion of this project. (Attach additional sheets if necessary.)

The 6-inch force main was installed on the east side of Durango Way, instead of the west side as initially designed. The original design called for crossing Durango Way twice. Once in construction, it was determined that crossing of Durango Way was not necessary. This deviation is shown on Sheets 5 and 6.

Construction of the force main on the other side of the road meets all the required minimum pipe separation vertical and horizontal distances from other utility lines.

Patrick C. Flynn, Regional Director Utilities Inc. of Florida 200 Weathersfield Avenue Altamonte Springs, FL 32714-4027 pcflynn@uiwater.com County: Lake PWS Name: Lake Utility Services Inc.- South PWS ID 3354881 Chlorine Dioxide Demonstration Testing Extension

Dear Mr. Flynn:

On December 27, 2017, the Department received a request to extend the chlorine dioxide fullscale demonstration testing at Greater Groves Water Treatment Plant (WTP) of Lake Utility Services Inc. (LUSI)- South Public Water System for an additional 4 weeks. Based on the information provided, the Department approves this request.

The 4-week full-scale demonstration testing extension shall follow the conditions set forth in the chlorine dioxide demonstration testing approval letter dated October 10, 2017. You may contact Nathan Hess, Environmental Administrator, or Daissan A. Villareal, Professional Engineer, at (407) 897-4140 or (407) 897-4129, respectively if you have any questions.

Sincerely,

Kimberly Rush, Program Administrator Permitting and Waste Cleanup Program

### RE: Lake Groves WTP Chlorine Dioxide Pilot Study -4-Week Extension

Dear Mr. Hess,

The FDEP approved Chlorine Dioxide pilot study at Utilities Inc. of Florida's Lake Groves Water Treatment Plant is nearing completion of the 6 weeks of pilot testing. This letter has been prepared to request a 4-week extension from the original completion date of December 25<sup>th</sup>, 2017 to gain additional DBP data and optimize the dosage rate. The initial results of the pilot study analysis are summarized as follows:

- Chlorine dioxide pre-oxidation followed by chlorine disinfection resulted in TTHM concentrations below the 80-ppb limit, at a concentration of approximately 24 mg/L at the POE, up to 37 mg/L in the maximum residence time (MRT) distribution sample location.
- The chlorite concentrations did not exceed the MCL of 1.0 ppm.
- The chlorine dioxide concentrations did not exceed the MRDL of 0.8 ppm.
- The HAA5 concentrations in the distribution system remained below the 60-ppb limit, at a concentration of approximately 12 mg/L at the POE, up to 21 mg/L in the distribution system MRT location.

The preliminary results indicate that chlorine dioxide pre-oxidation followed by chlorine disinfection is showing the ability to reduce DBPs formed in the distribution system. As we continue operation, we anticipate continued demonstration of low levels of DBPs formed within the distribution system. To generate another dosage rate, a 3-week run time for the pilot study will allow further assessment and dose optimization for the full-scale application of chlorine dioxide pre-oxidation for Lake Groves WTP. The results indicate continued compliance with applicable water quality standards and more specifically, DBPs can remain below the compliance limit with chlorine dioxide pre-oxidation.

Please review the information included within this letter in support of your approval for the 4-week pilot study extension from the original date of completion. We appreciate your timely review of these documents.

Ms. Daissan Villareal, P.E. Florida Department of Environmental Protection Central District 3319 Maguire Blvd., Suite 232 Orlando, Florida 32803 Central District FDEP Drinking Water Section "NO PERMIT REQUIRED FOR THIS PROJECT"

RE: Lake Utility Services - North PWS 3354883 FDEP Water Main Permit Notification Letter

Dear Ms. Villareal:

Utilities, Inc. of Florida needs to relocate approximately 1,240LF of 8" C-900 PVC water main servicing Oswalt Road in Clermont, FL. The water main relocation takes place in the same right-of-way as the existing water main and will be 8" C-900 PVC. This work is necessary to accommodate a pending Lake County Public Works stormwater and roadway improvements project. According to Rule 62-555.520(1)(c)2.,F.A.C., a permit is not required for the replacement of any existing water main with a new main at the same location of the existing main, provided the new main will be either the same size as the existing main, no more than two sizes larger than the existing main, or no larger than the minimum size required or recommended in *Recommended Standards for Water Works*.

The water main replacement will take place in the Lake County right-of-way along Oswalt Road. The Utility will also be adjusting (2) 8" gate valves.

All Water Main replacements will be in compliance with the requirements in Part III of Chapter 62-555, F.A.C. A markup showing the work to be completed has been attached. Please accept this notification on behalf of Utilities, Inc. of Florida for the planned water main replacements.

Sincerely,

Buyan K. Dongre RIDA

Bryan K. Gongre Regional Manager

DEP Construction Permit Number: 81396-006-DSGP/02

Substantially Complete Portion of Project if Other than Entire Project:

200 LF of 6-inch watermain on Darlington Drive and Arcadia Road; 5,780 LF of 4-inch watermain on Lemonwood Loop, Fruitwood Loop, Blossom Drive, Chancery Road, Grandin Blvd. Trafford Road, Longwood Ave, and the rear easement of North Darlington Drive.

#### II. Deviations from Department of Environmental Protection (DEP) Construction Permit for Project\*

Description and explanation of all deviations from the DEP construction permit, including the approved preliminary design report or drawings and specifications, for the substantially complete portion of this project:

220 LF 2-inch watermain was constructed along Holiday from Morelock to Kibler.

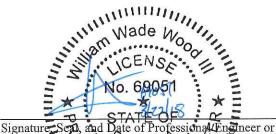

466 LF of 2-inch HDPE water main was NOT required to be constructed due to alignment adjustments.

6,420 LF of 4-inch HDPE water main was NOT required to be constructed due to alignment adjustments and discrepancies from the original record information. All pipe constructed is shown in the attached record drawings.

95 LF 6-inch water main was NOT required to be constructed along Bonita Road.

2.695 LF of 6-inch HDPE water main was NOT required to be constructed due to alignment adjustments and discrepancies from the original record information. All pipe constructed is shown in the attached record drawings.

I completed Part II of this form, and the information provided in Part II is true and accurate to the best of my knowledge and belief.

#### **III.** Certifications

Permittee\*

A. Certification by Permittee

I am duly authorized to sign this form on behalf of the permittee identified in Part I.D of this form. I certify the following:

- to the best of my knowledge and belief, the substantially complete portion of this project is sufficiently complete to be utilized for the purposes for which it is intended;
- to the best of my knowledge and belief, the substantially complete portion of this project has been completed in accordance with the Department of Environmental Protection construction permit, including the approved preliminary design report or drawings and specifications, for this project; or to the best of my knowledge and belief, the deviations described and explained in Part II of this form will not prevent the substantially complete portion of this project from functioning in compliance with Chapters 62-550 and 62-555, F.A.C.;

DEP Construction Permit Number: 81396-006-DSGP/02

Substantially Complete Portion of Project if Other than Entire Project:

200 LF of 6-inch watermain on Darlington Drive and Arcadia Road; 5,780 LF of 4-inch watermain on Lemonwood Loop, Fruitwood Loop, Blossom Drive, Chancery Road, Grandin Blvd. Trafford Road, Longwood Ave, and the rear easement of North Darlington Drive.

- to the best of my knowledge and belief, all new or altered public water system components that are included in the substantially complete portion of this project and that must be disinfected and bacteriologically surveyed or evaluated per subsection 62-555.315(6), F.A.C., or Rule 62-555.340, F.A.C., have been disinfected and bacteriologically surveyed or evaluated in accordance with said subsection or said rule;
- the permittee has had complete record drawings produced for the substantially complete portion of this project; to the best of my knowledge and belief, said record drawings adequately depict the substantially complete portion of this project as constructed and identify the deviations described and explained in Part II of this form; and said record drawings are available for review at the following location: Drawings are available ectronically and are attached.
- if the substantially complete portion of this project includes any new or altered drinking water treatment facilities, an operation and maintenance manual for said treatment facilities is available for reference at the site of said treatment facilities or at a convenient location near the site of said treatment facilities.

I also certify that, if the permittee will <u>not</u> own this project after it is placed into permanent operation, the permittee has provided a copy of the above mentioned record drawings and a copy of the above mentioned operation and maintenance manual, if applicable, to the PWS that will own this project after it is placed into permanent operation.

B. Certification by PWS Supplying Water to Project

I am duly authorized to sign this form on behalf of the PWS identified in Part I.E of this form. I certify that said PWS will supply the water necessary to meet the water demands for the substantially complete portion of this project, and I certify the following:

- to the best of my knowledge and belief, said PWS's connection to the substantially complete portion of this project will <u>not</u> cause said PWS to be, or contribute to said PWS being, in noncompliance with Chapter 62-550 or 62-555, F.A.C.;
- said PWS considers the connection(s) between the substantially complete portion of this project and said PWS acceptable as constructed.

C. Certification by PWS that Will Own Project After It Is Placed into Permanent Operation

I am duly authorized to sign this form on behalf of the PWS identified in Part I.F of this form. I certify that said PWS will own the substantially complete portion of this project after it is placed into permanent operation, and I certify the following:

- said PWS considers the substantially complete portion of this project acceptable as constructed;
- said PWS has received complete record drawings for the substantially complete portion of this project and the record drawings

are available for review at the following location:

• if the substantially complete portion of this project includes any new or altered drinking water treatment facilities, said PWS has received an operation and maintenance manual for the new or altered treatment facilities, and the operation and maintenance manual is available for reference at the site of the new or altered treatment facilities or at a convenient location near the site of the new or altered treatment facilities.

I understand that said PWS must operate and maintain this project in a such a manner as to comply with Chapters 62-550, 62-555, 62-560, and 62-699, F.A.C.

D. Certification by Professional Engineer in Responsible Charge of Inspecting Construction of Project\*

I, the undersigned professional engineer licensed in Florida, am in responsible charge of inspecting construction of this project for the purpose of determining in general if the construction proceeds in compliance with the Department of Environmental Protection (DEP) construction permit, including the approved preliminary design report or drawings and specifications, for this project. I, or a person acting under my responsible charge, observed construction of the substantially complete portion of this project and reviewed shop drawings, test results, and record drawings for the substantially complete portion of this project, and based upon said observation and reviews, I certify the following:

- the substantially complete portion of this project is sufficiently complete to be utilized for the purposes for which it is intended:
- the substantially complete portion of this project has been completed in accordance with the DEP construction permit, including the approved preliminary design report or drawings and specifications, for this project; or to the best of my knowledge and belief, the deviations described and explained in Part II of this form will not prevent the substantially complete portion of this project from functioning in compliance with Chapters 62-550 and 62-555, F.A.C.;
- all new or altered public water system components that are included in the substantially complete portion of this project and that must be disinfected and bacteriologically surveyed or evaluated per subsection 62-555.315(6), F.A.C., or Rule 62-555,340, F.A.C., have been disinfected and bacteriologically surveyed or evaluated in accordance with said subsection or said rule: and
- the record drawings for the substantially complete portion of this project adequately depict the substantially complete portion of this project as constructed and identify the deviations described and explained in Part II of this form.

 \* Whenever a project is decigned under the responsible charge of a professional engineer licensed in Florida and is permitted by

 the Department, construction by the project shall be inspected under the responsible charge of a professional engineer licensed in Florida. If construction of this project is inspected under the responsible charge of a professional engineer licensed in Florida, Part III.D of this form shall be completed, signed, sealed, and dated by the professional engineer in responsible charge. If this project is not inspected under the responsible charge of a professional engineer licensed in Florida, Part III.D does not have to be completed.

INSTRUCTIONS: This form shall be completed and submitted for projects permitted and constructed under specific Department of Environmental Protection (DEP) construction permits for public water system components, under the DEP's "General Permit for Construction of Water Main Extensions for Public Water Systems," or under the DEP's "General Permit for Construction of Lead or Copper Corrosion Control, or Iron or Manganese Sequestration, Treatment Facilities for Small or Medium Public Water Systems." AFTER COMPLETING, OR SUBSTANTIALLY COMPLETING, CONSTRUCTION OF A PROJECT, OR A PORTION THEREOF, AND BEFORE PLACING THE SUBSTANTIALLY COMPLETE PROJECT, OR PORTION THEREOF, INTO OPERATION FOR ANY PURPOSE OTHER THAN DISINFECTION, TESTING FOR LEAKS, OR TESTING EQUIPMENT OPERATION, complete and submit one copy of this form to the appropriate DEP District Office or Approved County Health Department along with one copy of the following information:

- the portion of record drawings showing deviations from the DEP construction permit, including the approved preliminary design report or drawings and specifications, if there are any deviations from said permit (note that it is necessary to submit a copy of only the portion of record drawings showing deviations and <u>not</u> a complete set of record drawings);
- bacteriological test results, including a sketch or description of all bacteriological sampling locations, demonstrating compliance with subsection 62-555.315(6), F.A.C., or Rule 62-555.340, F.A.C., if the substantially complete portion of the project includes any new or altered public water system (PWS) components that must be disinfected and bacteriologically surveyed or evaluated per said subsection or said rule;
- analytical test results demonstrating compliance with Part III of Chapter 62-550, F.A.C., or subsection 62-524.650(2), F.A.C., if the substantially complete portion of the project includes any new or altered PWS components that are necessary to achieve, or affect, compliance with said part or said subsection;
- a completed Form 62-555.900(20), New Water System Capacity Development Financial and Managerial Operations Plan, if the DEP construction permit was issued before the effective date of Rule 62-555.525, F.A.C., (9-22-99) and the substantially complete portion of the project creates a "new system" as described under subsection 62-555.525(1), F.A.C.; and
  any other information required by conditions in the DEP construction permit.

All information provided on this form shall be typed or printed in ink. NOTE THAT A SEPARATE CERTIFICATION OF CONSTRUCTION COMPLETION AND REQUEST FOR CLEARANCE IS REQUIRED FOR EACH PERMITTED PROJECT. DO NOT PLACE ANY NEW OR ALTERED PWS COMPONENTS INTO PERMANENT OPERATION UNTIL THE DEPARTMENT ISSUES WRITTEN APPROVAL, OR CLEARANCE, TO PLACE THE COMPONENTS INTO PERMANENT OPERATION.

# POTABLE WATER CLEARANCE - TOTAL

Patrick Flynn, Vice President Bear Lake System 200 Weathersfield Avenue Altamonte Springs, FL 32714 pcflynn@uiwater.com

> Clearance Type: Total Seminole County Permit Number: 0214327-002-DSGP PWS Name: Bear Lake PWS ID: 3590069 Project Name: Bear Lake Manor WME Project Location: Along Bear Lake Road, Lina Lane, and Mirror Lake Drive

Dear Mr. Flynn:

This letter acknowledges receipt of the certification, dated March 19, 2018, for the subject water distribution system extension. The submitted information demonstrates the water distribution system extension has been constructed in accordance with the FDEP Permit Number above and related plans and materials and that satisfactory pressure and bacteriological tests were conducted in accordance with the AWWA standards. Based on the certification and satisfactory bacteriological results, the Department is clearing the system for service.

If you have any questions or comments regarding this total clearance, please contact Daissan A. Villareal by telephone at 407-897-4129 or by e-mail at daissan.a.villareal@dep.state.fl.us.

#### (4) Professional Engineer Registered in Florida

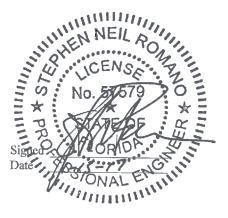

I, the undersigned professional engineer registered in Florida, certify the following:

- that this project has been constructed in accordance with the construction permit and engineering plans and specifications or that, to the best of my knowledge and belief, any deviations from the construction permit and engineering plans and specifications will not prevent this project from functioning in compliance with Chapter 62-604, F.A.C.;
- that the record drawings for this project are adequate and include substantial deviations\*\* from the construction permit and engineering plans and specifications;
- that a copy of the record drawings has been provided to the permittee and to the wastewater treatment facility serving the collection/transmission system;
- that the O&M manual for this project has been prepared or examined by me, or by an individual(s) under my direct supervision, and that there is reasonable assurance, in my professional judgment, that the facilities, when properly maintained and operated in accordance with this manual, will function as intended; and
- that, to the best of my knowledge and belief, appropriate leakage tests have been performed and the new or modified facilities met the specified requirements.

This certification is based upon on-site observation of construction conducted by me or by a project representative under my direct supervision and upon a review of shop drawings, test results/records, and record drawings performed by me or by a project representative under my direct supervision.

The following is a description and explanation of substantial deviations\*\* from the construction permit and engineering plans and specifications for the substantially completed portion of this project. (Attach additional sheets if necessary.)

Patrick Flynn, Vice President Utilities, Inc. of Florida 200 Weathersfield Avenue Altamonte Springs, FL 32714 pcflynn@uiwater.com DEP File No. 0080880-005-WC County: Seminole Ravenna Park Water Treatment Plant PWS ID 3591061 Total clearance for: Ravenna Park Water Treatment Plant Improvements

Dear Mr. Flynn:

This letter acknowledges receipt of your engineer's August 23, 2016 certification that the subject water treatment plant modification is completed in accordance with the FDEP Permit Number 0080880-005-WC dated April 2, 2015, and the related plans and materials. The engineer submitted information to demonstrate that satisfactory pressure and leakage test, two-day bacteriological tests were conducted for the system in accordance with the AWWA Standards. The utility and/or the owner/operator of the system is entirely responsible for the water's microbiological quality at the point and time it reaches the consumer's meter, and must ensure the water quality is representative of these certified bacteriological test results. the Water Treatment Plant is at 111 Temple Drive in Sanford, Florida.

Based on this certification and satisfactory bacteriological results, the Department is clearing the system for service. **This constitutes the total clearance for this project.** 

The well at the Crystal Lake WTP went dry, and water for its service area is temporarily being purchased from the City of Sanford through an existing interconnection. Utilities, Inc.of Florida demolished the existing 20,000, gallon ground storage tank and 440-gpm cascade aerator. Permit No. 0080880-006-DS was issued on March 27, 2015 to interconnect the Crystal Lake and Ravenna Park service areas. Upon clearance of this permit, the Crystal Lake WTP will be decommissioned. The combined service areas will have a total of 513 service connections to serve 1,796 people.

The Ravenna Park WTP is currently rated at 360,000 gallons per day but will be rerated to 300,000 gallons per day. There are currently two wells (rated 200 and 240 gallons per minute), two high service pumps (rated @250 gpm), a 3,000-gallon hydropneumatic tank,

Clearance Letter Page 2 August 24, 2016

**No additional clearances or construction activities are allowed under this permit.** This letter of clearance does not preclude your need to obtain approvals as required by other entities.

### **Constructed components include the following:**

- One (1) 31-foot diameter, 17-foot high ground storage tank with a total volume of 105,000 gallons.
- One (1) 560-gpm cascade aerator adjacent to the tank.
- Relocation of the existing high service pumps, hydropneumatic tank and associated appurtenances such as piping valves, etc.

### <u>Please note: This clearance does not allow for decommissioning of Crystal Lake WTP.</u> <u>Separate notification must be submitted to the Department.</u>

### POTABLE WATER CLEARANCE - FINAL

Patrick Flynn, Vice-President Utilities Inc. Florida-Sanlando 200 Weathersfield Avenue Altamonte Springs, FL 32714 PcFlynn@uiwater.com

> Clearance Type: Final Clearance Type: Partial Seminole County Permit Number: 0080881-059-DSGP PWS Name: Sanlando PWS ID: 3591121 Project Name: Myrtle Lake Hills WM Extension Project Location: Extends north from the intersection of Windy Ridge Court and Myrtle Lake Hills Road to the intersection of Canal Point Road and Myrtle Lake Hills Road.

Dear Mr. Flynn:

This letter acknowledges receipt of the certification, dated December 15, 2016, for the subject water distribution system extension. The submitted information demonstrates the system extension has been constructed in accordance with the FDEP Permit Number above and related plans and materials and that satisfactory pressure and bacteriological tests were conducted in accordance with the AWWA standards. Based on the certification and satisfactory bacteriological results, the Department is clearing the system for service.

If you have any questions or comments regarding this final clearance, please contact Daissan Villareal by telephone at 407-897-4129 or by e-mail at Daissan.a.Villareal@dep.state.fl.us.

Sincerely,

aisrant, Villareal

Dear Mr. Flynn:

This letter acknowledges receipt of the certification, dated March 26, 2018, for the subject water distribution system extension. The submitted information demonstrates that the water distribution system extension has been constructed in accordance with the FDEP Permit Number above and related plans and materials for the partial work described below and that satisfactory pressure and bacteriological tests were conducted in accordance with the AWWA standards. Based on the certification and satisfactory bacteriological results, the Department is partially clearing the system for service. Separate clearance is required for the remainder of the project.

Partial clearance limited to: Approximately 4,510 linear feet of 6-inch water main on Powers Drive, Melbourne Avenue, Ridgewood Avenue, Robinson Street and Nice Avenue.

If you have any questions or comments regarding this partial clearance, please contact Daissan A. Villareal by telephone at 407-897-4129 or by e-mail at daissan.a.villareal@dep.state.fl.us.

RE: Sanlando Utilities PWS 3591121 FDEP Water Main Permit Notification Letter

Dear Ms. Villareal:

Utilities, Inc. of Florida – Sanlando needs to relocate approximately 900LF of 6" Cl-160 PVC water main servicing Autumn Drive in Longwood, FL. The water main relocation takes place in the same right-of-way as the existing water main and will be 6" DR-11 HDPE. This work is necessary as the existing pipe has a high failure rate and has been repaired several times. According to Rule 62-555.520(1)(c)2.,F.A.C., a permit is not required for the replacement of any existing water main with a new main at the same location of the existing main, provided the new main will be either the same size as the existing main, no more than two sizes larger than the existing main, or no larger than the minimum size required or recommended in *Recommended Standards for Water Works*.

The water main replacement will take place in the utility easement on Autumn Drive in The Springs subdivision. The Utility will also reconnecting (2) 2" PVC water mains and reconnecting service laterals as needed.

All Water Main replacements will be in compliance with the requirements in Part III of Chapter 62-555, F.A.C. A markup showing the work to be completed has been attached. Please accept this notification on behalf of Utilities, Inc. of Florida for the planned water main replacement.

Sincerely, UTILITIES INC. OF FLORIDA

# Utilities, Inc. of Florida Little Wekiva System Water Main FDEP Water Main Permit Notification Letter

Dear Caroline:

CPH, Inc. was contracted to provide design services to Utilities, Inc. of Florida for utility replacement of their Little Wekiva Water Main system. The utility replacements take place in the same right-of-way as the existing lines. According to Rule 62-555.520(1)(c)2.,F.A.C., a permit is not required for the replacement of any existing water main with a new main at the same location of the existing main, provided the new main will be either the same size as the existing main, no more than two sizes larger than the existing main, or no larger than the minimum size required or recommended in *Recommended Standards for Water Works*.

The utility replacements will take place in the right-of-way along Richbee Drive, Camellia Avenue, Little Wekiva Drive, and Bambi Avenue in Altamonte Springs. Approximately 3,430 linear feet of 2" Water Main will be replaced with 2" and 4" Water Main. There is approximately 950 linear feet of water main to be replaced on Richbee Drive, 720 linear feet of water main to be replaced on Camellia Avenue, 731 linear feet of water main to be replaced on Bambi Avenue, and 1,020 linear feet of water main to be replaced on Little Wekiva Drive.

All Water Main replacements will be in compliance with the requirements in Part III of Chapter 62-555, F.A.C. A set of design plans for Utilities, Inc. of Florida Little Wekiva Water Main System Replacement Project is included with this submittal. Please accept this notification on behalf of Utilities, Inc. of Florida for the planned water main replacements.

Sincerely,

CPH, Inc.

Dear Mr. Flynn,

The Department has received your *Request for Approval to Place a Domestic Wastewater Collection/ Transmission System into Operation* [FDEP Form 62-604.300(8)(b)] and supporting documents for the above-referenced project. This project was approved for construction under the permit application number described above, issued on March 8, 2016. The engineer of record certified that the collection/transmission system has been completed with substantial deviations.

The submitted documents indicate compliance with the clearance procedures identified in Rule 62-604.700, Florida Administrative Code (FAC). Therefore, the Department is issuing this letter of release to place the above-referenced domestic wastewater collection/transmission system into service. Pursuant to 62-604.700, FAC, portions of this project that have not been cleared for service may not be placed into operation for any purpose other than testing for leaks or equipment operation.

You must comply with any changes in applicable laws and regulations that affect operating procedures and/or quality standards, and be aware of and operate under the general conditions included in your permit. General permit conditions are binding upon the permittee and enforceable pursuant to Chapter 403 of the Florida Statutes.

If you have any questions, please contact Astrid Flores Thiebaud at (813) 470-5760 or via email at <u>Astrid.Floresthiebaud@dep.state.fl.us</u>.

Sincerely,

There By Richard

From:Julian Coto < Julian@Excelengineers.com>Sent:Tuesday, March 27, 2018 2:39 PMTo:Mike Wilson; 'Colleen Kleist'Cc:Patrick Flynn; Julian@Excelengineers.comSubject:Eagle Ridge Clearance

Hello again Colleen;

Please be advised that I spoke with FDEP today about the Clearance with regard to Eagle Ridge.

I was told that they don't issue a formal response to the Clearance. It was confirmed that they did receive it and by that act and based on our certification it is Cleared.

Please resume making the necessary connections in order to bring the new Flow Equalization Basin online, removing the old ones and restoring the site.
