#### **VIA Electronic Filing**

April 17, 2018

Florida Public Service Commission Carlotta S. Stauffer, Commission Clerk Office of the Commission Clerk 2540 Shumard Oak Boulevard Tallahassee, FL 32399-0850

Re: City of Bartow, Florida – Revised Tariff Sheets

Dear Ms. Stauffer:

This letter is submitted on behalf of the City of Bartow, Florida pursuant to Rules 25-9.051through 25-9.071 of the *Florida Administrative Code*.

Electronically filed are the following revisions to Bartow's tariff sheets in legislative and final filing formats:

- a) Twentieth Revised Sheet No. 5.0 General Service Non-Demand Rate;
- b) Nineteenth Revised Sheet No. 6.0 General Service Demand Rate Secondary;
- c) Third Revised Sheet No. 6.1 General Service Demand Primary;
- d) First Revised Sheet No. 6.2 General Service Demand Large Power;
- e) Sixth Revised Sheet No. 6.3 General Service Demand Low Load Factor;
- f) Nineteenth Revised Sheet No. 7.0 Residential Service, and,
- g) First Revised Sheets 9.6 and 9.6.1 Economic Development Rider.

Also filed for information and supportive purposes are copies of the following:

- 1) Signed copy of Bartow Ordinance No. 2018-04 with exhibits (7 pgs.) and,
- 2) 2017 Electric Rate Study for City of Bartow (65 pgs.).

If you have any questions or need clarification, please do not hesitate to contact our office.

Very truly yours,

/s/ Jody Lamar Finklea General Counsel and Chief Legal Officer

#### RATE SCHEDULE GS

AVAILABILITY - Available throughout the area served.

APPLICABILITY – For lighting and power in establishments not classed as Residential Service or General Service Demand.

CHARACTER OF SERVICE - Single or three phase, 60 hertz, and at an available standard secondary voltage of the City.

LIMITATIONS - Subject to all the rules and regulations of the City of Bartow. Standby or resale not permitted.

RATES -

Service Charge

\$8.70

\$8.00 per month

**Energy Charge** 

\$0.06320 \$0

\$0.06100 per kWh

MINIMUM CHARGE – The minimum monthly charge shall be the service charge plus other applicable charges covered by Ordinance, State Statutes or Federal Law.

BILLING ADJUSTMENTS - See "Power Cost Adjustment" beginning on Sheet No. 9.0

See "Public Service Tax and Surcharge" beginning on Sheet No. 9.1

See "Florida Gross Receipts tax" beginning on Sheet No. 9.3

See "Florida Sales Tax" beginning on Sheet No. 9.5.

#### RATE SCHEDULE GSD LOW LOAD FACTOR

AVAILABILITY - Available throughout the area served.

APPLICABILITY – For lighting and power in non-residential establishments with an electrical demand requirement of 20 kW or more, but not in excess of 200 kW, and with an average monthly load factor of less than 25%.

CHARACTER OF SERVICE - Single or three phase, 60 hertz, and at an available standard secondary or primary voltage of the City.

LIMITATIONS - Subject to all the rules and regulations of the City of Bartow. Resale not permitted. Standby generating equipment is permitted for emergency purposes only.

RATES -

Service Charge

\$21.10

\$20.00 per month

**Energy Charge** 

\$0.08855 \$0.08380 per kWh

BILLING DEMAND - The maximum 15 minute integrated demand will be metered monthly, but will not be applied in the billing process.

MINIMUM CHARGE – The minimum monthly charge shall be the service charge plus other applicable charges covered by Ordinance, State Statutes or Federal Law.

BILLING ADJUSTMENTS - See "Power Cost Adjustment" beginning on Sheet No. 9.0

See "Public Service Tax and Surcharge" beginning on Sheet No. 9.1 See "Florida Gross Receipts tax" beginning on Sheet No. 9.3 See "Florida Sales Tax" beginning on Sheet No. 9.5.

SPECIAL CONDITIONS – Customers must apply in writing for service under this rate schedule, and must remain under this rate schedule for a period of at least one year. Thereafter, in the event a customer served under this rate schedule modifies their electric usage such that Rate Schedule GSD is more advantageous, said customer will be permitted to change to billing under Rate Schedule GSD, upon written request. Customers electing to change to Rate Schedule GSD must remain under that rate schedule for a period of at least one year.

By making application for Rate Schedule GSD Low Load Factor, the customer also agrees to the installation of load control equipment by, and at the option of, the City.

#### ECONOMIC DEVELOPMENT RIDER

AVAILABILITY - Available throughout the area served.

APPLICABILITY — This rider is available for load associated with initial permanent service to new establishments or the expansion of existing establishments. Service under this Rider is limited to customers who make application to the City for service under this Rider, and for whom the City approves such application after January 1, 2018 July 1, 2011. The new load applicable under this Rider, either for a new establishment or the incremental new load for an existing establishment must be a minimum of 500 kW and 200,000 kWh per month at a single delivery point.

Initial application for this Rider is not available to existing load. However, if a change in ownership occurs after the customer contracts for service under this Rider, the successor customer may be allowed to fulfill the balance of the contract under this Rider and continue the schedule of credits outlined below. This Rider is not available for renewal of service following interruptions such as equipment failure, temporary plant shutdown, strike or economic conditions. This Rider is not available for load shifted from one establishment or delivery point on the City system to another on the City system.

The load and employment requirements under this Rider must be achieved at the same delivery point. Additional metering equipment may be required to qualify for this Rider. The customer's service agreement under this Rider must include a description of the amount and nature of the load being provided, the number of full-time jobs resulting, and documentation verifying that the availability of the Economic Development Rider is a significant factor in the customer's location/expansion decision.

LIMITATIONS – The City reserves the right to limit applications for this Rider when the City's economic development expenses from this rider and other sources exceed \$200,000 per year.

DEFINITION - New Load is that which is added to the City's system by a new establishment after <u>January 1</u>, <u>2018 July 1, 2011</u>. For existing establishments, New Load is the net incremental load above that which existed prior to approval for service under this Rider.

DESCRIPTION – A credit based on the percentages below will be applied to the customer charge, demand charge, energy charge and purchased power adjustment of the customer's otherwise applicable rate schedule associated with the customer's New Load:

Year 1 – 20% reduction

Year 2 - 15% reduction

Year 3 - 10% reduction

Year 4 – 5% reduction

Year 5 – 5% reduction

(Continued on Sheet No. 9.6.1)

Issued by: George A. Long City Manager (Continued from Sheet No. 9.6)

TERM OF SERVICE – The customer agrees to a five year contract term. Service under this Rider will terminate at the end of the fifth year.

The City may terminate service under this Rider at any time if the customer fails to comply with the terms and conditions of this Rider. Failure to: (1) maintain the level of employment specified in the customer's service agreement and/or (2) purchase from the City the amount of load specified in the customer's service agreement may be considered grounds for termination.

PROVISIONS FOR EARLY TERMINATION – If the City terminates service under this Rider for the customer's failure to comply with its provisions, the Customer will be required to reimburse the City for any discounts received under this Rider plus interest.

If the customer opts to terminate service under this Rider before the term of service specified in the service agreement, the customer will be required to reimburse the City for any discounts received under this Rider plus interest.

#### ORDINANCE NO. 2018-04

AN ORDINANCE RELATING TO ELECTRIC RATES AND THE POWER COST ADJUSTMENT CALCULATION; MAKING FACTUAL FINDINGS IN SUPPORT THEREOF; AMENDING §78-151 OF THE CODE OF ORDINANCES OF THE CITY OF BARTOW TO ADJUST ELECTRIC RATES; PROVIDING FOR SEVERABILITY, CODIFICATION, THE ADMINISTRATIVE CORRECTION OF SCRIVENER'S ERRORS AND AN EFFECTIVE DATE

WHEREAS, the City of Bartow is a Florida municipal corporation endowed with home rule "governmental, corporate and proprietary powers" sufficient to enable it "to conduct municipal government, perform municipal functions and render municipal services" by §2(b), Article VIII of the Florida Constitution of 1968 and the Municipal Home Rule Powers Act of 1973; and

WHEREAS, the City engaged the services of Leidos Engineering, LLC, to perform a study of the City's current electric rates and power cost adjustment and to provide recommendations for any adjustments to the rate design. This study is known as the "2017 Electric Rate Study". Leidos analyzed the City's current rate structure, power cost adjustment and future system costs, and ultimately recommended to the City the rates and power cost adjustment calculation as indicated on Exhibit A to this Ordinance. The analysis is detailed in the full report provided by Leidos to the City; and

WHEREAS, the City of Bartow, Florida desires to amend its electric rates and to reflect the effects of projected costs.

NOW, THEREFORE,

Be it enacted by the People of the City of Bartow:

Section 1 <u>Incorporation of Recitals.</u>

The foregoing recitals are found true by the City Commission, are incorporated herein and are found to form a factual basis for the adoption of this ordinance.

#### Section 2 Common Title.

This ordinance shall be commonly known as the "Bartow Electric Rate Ordinance of 2018" and may be so cited.

#### Section 3 <u>Electric Rates and Power Cost Adjustment Calculation Adopted.</u>

§78-151 of the Code of Ordinances of the City of Bartow shall be revised as set forth in Exhibit 'A' to this ordinance, a copy of which is attached hereto and incorporated herein, such copy consisting of 3 numbered pages. In accordance with §166.041(2), Florida Statutes, added language to existing code provisions will be <u>underlined</u> and deleted language from existing code provisions will be <u>stricken through</u>.

#### Section 4 Severability.

If any provision or portion of this ordinance is declared by a court of competent jurisdiction to be void, unconstitutional, or unenforceable, then all remaining portions, provisions, and regulations of this ordinance shall remain in full force and effect.

### Section 5 <u>Administrative Correction of Scrivener's Errors.</u>

Any scrivener's error created as a result of the passage of this ordinance may be corrected by the City Manager of the City of Bartow, without further legislative action, so long as the intent of this ordinance is preserved, by filing a revised copy thereof with the City Clerk's office with the terms "Manager Revised" and the revision version number in the style of the ordinance.

#### Section 6 Codification.

It is the intent of the City Commission that the provisions of Exhibit 'A' to this ordinance shall be codified as and become and be made a part of the permanent *Code of Ordinances of the City of Bartow*. The provisions of Exhibit 'A' to this ordinance may be renumbered or relettered to accomplish such intention and the word "ordinance", or similar words, may be changed to "section," "article", or other appropriate word. Further, it is the intent of the City Commission that the implementing and instructional sections of this ordinance, Sections 1 through 7, shall not be codified. The Code codifier is granted liberal authority to codify the provisions of Exhibit 'A' to this ordinance, including the authority to modify cross-references as he or she may see fit to capture the intent of this ordinance.

#### Section 7 <u>Effective Date.</u>

This ordinance and related rate adjustments shall take effect on April 1, 2018.

INTRODUCED AND PASSED on first reading at the Regular meeting of the City of Bartow City Commission held this <u>5th</u> day of March, 2018.

PASSED AND ADOPTED on second reading at the Regular meeting of the City of Bartow City Commission held this 19th day of March, 2018.

Mayor James F. Clements

Approved as to correctness and form:

Approved as to substance:

City Attorney Sean R. Parker

City Manager George A. Long

#### Exhibit "A"

#### Sec. 78-151. Rates and Charges.

(a) Monthly Service Rates. Electric service furnished by the city shall be billed at the following monthly rates and charges; provided, however, that when two or more rates are applicable to the same service, the customer shall be billed at the higher rate. Rules and regulations governing the determination of the applicable rate may be promulgated by resolution of the city commission.

| Customer service charge | \$ <del>20.00</del> 21.10 |
|-------------------------|---------------------------|
|                         | 0.0205000.02164           |
| Demand charge, each kW  |                           |
| Minimum charge          |                           |
|                         | plus Demand Charges       |

c. Large power:

| Customer service charge | 20.0021.10                             |
|-------------------------|--|
|                         | /h <del>0.01930</del> 0 <u>0.02047</u> |
|                         | W8.565 <u>9.10</u>                     |
|                         | Customer Service Charge                |
|                         | plus Demand Charges                    |

4. Low load factor rate:

| Customer service charge | 20.0021.10      |
|-------------------------|-----------------|
| Energy charge, each kWh | .0.083800.08855 |
| Minimum charge          | 20.0021.10      |

The rates and charges for electric service furnished by the city outside of its corporate limits shall be as provided in this section plus a surcharge of ten percent of that amount. The United States of America, the state, the county, cities, and their commissions and agencies, and other tax-supported bodies, authorities, boards and commissions, and any church recognized in the state if the electric service is used exclusively for church purposes, are exempt from the surcharge imposed under this section.

#### Exhibit "A"

- (b) Power cost adjustment.
- (1) Applicability. The power cost adjustment is to be added to or subtracted from the monthly rate per kWh of each filed rate schedule.
- (2) Calculation. The power cost adjustment shall be calculated as follows:

1. Projected Power Supply Costs

\$ x,xxx,xxx

2. Other Costs to be Recovered [1]

\$ xxx,xxx

Total Costs to be Recovered

x,xxx,xxx Line 1 + or - Line 2

Total Projected Energy Sales (kWh)

x,xxx,xxx

5. PCA - Total Cost per kWh

\$ x,xxxxx Line 3 / Line 4

- [1] Including costs under or over recovered in the prior period(s).
- (c) Extension of electric lines. The extension of electric lines shall be performed in accordance with the rules, regulations, and standards promulgated by the city manager or his designee, approved by motion of the city commission and filed with the city clerk; such rules shall include the rates and charges for the installation and for the service.
- (d) Economic Development Rider
- (1) Availability. Available throughout the area served.
- (2) Applicability. This rider is available for load associated with initial permanent service to new establishments or the expansion of existing establishments. Service under this Rider is limited to customers who make application to the City for service under this Rider, and for whom the City approves such application after July 1, 2011 January 1, 2018. The new load applicable under this Rider, either for a new establishment or the incremental new load for an existing establishment must be a minimum of 500 kW and 200,000 kWh per month at a single delivery point.

Initial application for this Rider is not available to existing load. However, if a change in ownership occurs after the customer contracts for service under this Rider, the successor customer may be allowed to fulfill the balance of the contract under this Rider and continue the schedule of credits outlined below. This Rider is not available for renewal of service following interruptions such as equipment failure, temporary plant shutdown, strike or economic conditions. This Rider is not available for load shifted from one establishment or delivery point on the City system to another on the City system.

The load and employment requirements under this Rider must be achieved at the same delivery point. Additional metering equipment may be required to qualify for this Rider. The customer's service agreement under this Rider must include a description of the amount and nature of the load being provided, the number of full-time jobs resulting, and documentation verifying that the availability of the Economic Development Rider is a significant factor in the customer's location/expansion decision.

#### Exhibit "A"

- (3) Limitations. The City reserves the right to limit applications for this Rider when the City's economic development expenses from this rider and other sources exceed \$200,000 per year.
- (4) Definition. New Load is that which is added to the City's system by a new establishment after July 1, 2011 January 1, 2018. For existing establishments, New Load is the net incremental load above that which existed prior to approval for service under this Rider.
- (5) Description. A credit based on the percentages below will be applied to the customer charge, demand charge, energy charge and purchased power adjustment of the customer's otherwise applicable rate schedule associated with the customer's New Load:

Year 1 – 20% reduction Year 2 – 15% reduction Year 3 – 10% reduction Year 4 – 5% reduction Year 5 – 5% reduction

(6) *Term of Service.* The customer agrees to a five year contract term. Service under this Rider will terminate at the end of the fifth year.

The City may terminate service under this Rider at any time if the customer fails to comply with the terms and conditions of this Rider. Failure to: (1) maintain the level of employment specified in the customer's service agreement and/or (2) purchase from the City the amount of load specified in the customer's service agreement may be considered grounds for termination.

(7) Provision for Early Termination. If the City terminates service under this Rider for the customer's failure to comply with its provisions, the Customer will be required to reimburse the City for any discounts received under this Rider plus interest.

If the customer opts to terminate service under this Rider before the term of service specified in the service agreement, the customer will be required to reimburse the City for any discounts received under this Rider plus interest.

# 2017 Electric Rate Study

City of Bartow, Florida

February 2018

This report has been prepared for the use of the client for the specific purposes identified in the report. The conclusions, observations and recommendations contained herein attributed to Leidos constitute the opinions of Leidos. To the extent that statements, information and opinions provided by the client or others have been used in the preparation of this report, Leidos has relied upon the same to be accurate, and for which no assurances are intended and no representations or warranties are made. # Section 1 INTRODUCTION, PURPOSE AND SCOPE

## Introduction

The City of Bartow, Florida (the "City") owns and operates an electric system that serves over 12,000 customers in Central Florida (the "Electric Department"). The City engaged Leidos Engineering, LLC, ("Leidos", the "Consultant" or the "firm") to review its current rates for electric service and to provide recommendations for any necessary adjustments to the rate design (the "2017 Electric Rate Study"). During 2017, the City provided the firm with responses to data requests and the firm performed various analyses that resulted in adjustments to certain data.

In conducting this 2017 Electric Rate Study, the firm relied upon historical and projected data for the development of operating revenues, operating expenses, and capital requirements. Historical data was obtained from various monthly reports, annual financial reports, actual billing records, analyses, and discussions with members of the management and staff of the City. Projected data was, in part, derived from historical data adjusted for current economic conditions, the Operating Budget for Fiscal Year ending September 30, 2018 (the "Budget"), the City's electric system demand and energy forecasts (including the effects of energy conservation), the various contracts, and the direction and instructions provided by the City, and other appropriate sources.

The approach and methodology followed in performing the 2017 Electric Rate Study along with the findings and recommendations are presented in this report.

## **Purpose**

The primary purposes of the 2017 Electric Rate Study are:

- 1. To determine the estimated annual revenue requirements for the Fiscal Year ending September 30, 2018, as adjusted for known changes (the "Test Year").
- 2. To ensure that the rates produce sufficient revenues to maintain the Electric Department;
- 3. To prepare a cost of service analysis to estimate the cost of providing electric service by customer class;
- 4. To adjust rate levels, if necessary, in order to recover the cost of providing service, and to reflect the policies established by the City;
- 5. To reflect any changes introduced by the implementation of any new power purchase contracts with the power supplier; and
- 6. To continue to recover periodically, the cost of purchased power.

## Scope

The overall scope of services of the 2017 Electric Rate Study provided for (i) the development of a revenue requirements study for the Test Year; (ii) the development of proposed rate levels and rate structures that are designed to recover the revenue requirements for the Test Year which reflect the City's policy and industry practices; and (iii) the development of comparisons of typical bills for electric service calculated using the existing and proposed rates and the rates charged by neighboring privately and publicly owned electric utilities.

The 2017 Electric Rate Study consists of two phases. Phase I activities include, among other things, (i) obtaining and reviewing historical billing data, (ii) reconciling such data, (iii) identifying the proper energy sales forecast to use for purposes of projecting rate revenues and costs (iv) projecting billing determinants in order to calculate the effect on revenues based on revised rates, (v) preparing projections of revenues by major customer class, (vi) developing projected annual revenue requirements for the Test Year, (vii) preparing a comparison of the City's existing rates and the rates of other Florida utilities, and (viii) preparing a Phase I report.

Phase II activities include (i) revising the revenue requirements, (ii) affirming the City's policies and direction, (iii) allocating costs, (iv) designing the proposed rates, and (v) preparing a final report.

# Section 2 ENERGY REQUIREMENTS AND CUSTOMER STATISTICS

## General

The development of accurate forecasts of future energy and demand requirements, sales, customers and customer usage characteristics, is essential in the evaluation of the adequacy of electric rates and rate structures. This section of the report summarizes the various factors considered and utilized in the development of the City's near term future energy and demand requirements.

The estimates of energy and demand requirements developed for inclusion in this study are based on historical sales, customers, and customer usage characteristics.

## **Energy and Demand Requirements**

## **Projection of Electricity Sales to Ultimate Customers**

The projections of electric energy sales to ultimate customers are based on an analysis of historical billing and sales information for the fiscal year ended September 30, 2017. Historical growth, usage patterns, and effects of weather were tested for reasonableness. Based on information provided by the City, it was projected that the reported number of customers and kWh sales would increase by 0.5% annually beginning in October 2017 for the projected fiscal year 2018.

## **Projected Demand**

The historical system peak demand for the fiscal year ending September 30, 2017 was 63,000 kW, occurring in August. For purposes of this Study, it was projected that the system peak demand would increase at an annual rate of 0.5%.

## **Projected Energy Sales**

The monthly system historical and projected energy sales are set forth in Table No. 2-1. The following tabulation is an annual summary of the historical and projected energy sales by major customer class:

## Retail Energy Sales (Mwh) Fiscal Years Ending September 30,

| Customer Class             | Historical<br>FY 2017 | Projected<br>FY 2018 |
|----------------------------|-----------------------|----------------------|
| Residential                | 135,393               | 136,070              |
| General Service Non-Demand | 13,908                | 13,978               |
| General Service Demand     | 118,152               | 118,743              |
| General Service Demand     |                       |                      |
| Low Load Factor            | 1,515                 | 1,523                |
| TOTAL ENERGY SALES         | 268,969               | 270,314              |
| Percent Change (%)         |                       | 0.5%                 |

Sales in Fiscal Test Year 2018 are based on 2017 amounts with a projected annual growth rate of 0.5%.

## **Projected Average Number of Customers**

An integral part of the forecasting process is the average number of customers the City expects to serve by major customer class. The detailed historical and projected customers are set forth on Table No. 2-1, pages 1 and 2. The following is a summary of the historical and projected average number of customers used as a basis for this study:

# Average Monthly Number of Customers Fiscal Years Ending September 30,

| Customer Class             | Historical<br>FY 2017 | Projected<br>FY 2018 |
|----------------------------|-----------------------|----------------------|
| Residential                | 10,460                | 10,512               |
| General Service Non-Demand | 1,241                 | 1,247                |
| General Service Demand     | 402                   | 404                  |
| General Service Demand     |                       |                      |
| Low Load Factor            | 47                    | 47                   |
| TOTAL AVG. CUSTOMERS       | 12,150                | 12,210               |
| Percent Change (%)         |                       | 0.5%                 |

## **Purchased Power**

Beginning January 1, 2018, the City began purchasing its capacity and energy requirements under new contracts with Orlando Utilities Commission (OUC) and the Florida Municipal Power Agency (FMPA).

## **Energy Losses**

The loss factors utilized in developing the projected energy requirements for the Test Year are 6.0 percent of annual energy requirements. This factor is used to take into account transmission and distribution losses and unaccounted for energy.

## Summary of Projected Demand and Energy Requirements

The following tabulation sets forth the projected annual peak demand at the generation level, energy requirements and the system load factor used in this study:

| Description                             | 2018<br>Test Year |
|---|-------------------|
| Annual 60-Minute Peak Demand (MW)       | <u>63</u>         |
| Annual Energy Sales (GWh)               | 270               |
| Losses and Unaccounted for Energy (GWh) | <u>18</u>         |
| Annual Energy Requirements (GWh)        | <u>288</u>        |
| Annual System Load Factor (%)           | <u>49</u> %       |

## **Customer Statistics**

Projected customer statistics by major rate classification are set forth on Table No. 2-1 and No. 2-2. Table No. 2-1 sets forth for fiscal years ending September 30, 2017 through 2018 the historical and projected number of customers and energy sales. Table No. 2-2 sets forth the projected annual billing determinants by major rate classes for fiscal year 2018. The projected average annual number of customers and annual energy sales for the fiscal year ending September 30, 2018 incorporate the following considerations:

- i. continuation of recent historical sales and/or usage characteristics;
- ii. continuation of past, present, and projected conservation and demand-side management programs; and
- iii. continuation of the existing regulatory structure.

Any departure from those assumptions (e.g., change in economic activity) could have a material adverse effect on energy sales and revenues.

As derived from Tables No. 2-1 and No. 2-2, the projected fiscal year 2018 composition of the City's ultimate customers and associated energy sales by major rate classification is tabulated below:

## **Customers and Energy Sales by Customer Class**

## Test Year 2018

| Customer Class             | Average<br>Number of<br>Customers | Percent<br>of Total | Annual<br>Megawatt-<br>Hour Sales | Percent<br>of Total |  |  |
|----------------------------|-----------------------------------|---------------------|-----------------------------------|---------------------|--|--|
| Residential                | 10,512                            | 86.1%               | 136,070                           | 50.3%               |  |  |
| General Service Non-Demand | 1,247                             | 10.2%               | 13,978                            | 5.2%                |  |  |
| General Service Demand     | 404                               | 3.3%                | 118,743                           | 43.9%               |  |  |
| General Service Demand     |                                   |                     |                                   |                     |  |  |
| Low Load Factor            | 47                                | 0.4%                | 1,523                             | 0.6%                |  |  |
| Total Customers            |                                   |                     |                                   |                     |  |  |
| and MWh Sales              | 12,210                            | 100.0%              | 270,314                           | 100.0%              |  |  |

### General

The various components of costs associated with the operation, maintenance, funding of improvements, renewal and replacement of facilities, and assurance of the adequacy and continuity of reliable service to customers are generally referred to as the revenue requirements of a municipally owned and operated utility. The determination of the revenue requirements as they relate to the City, consistent with the methods of other publicly owned utilities, includes the various generalized cost components described below.

*Operation and Maintenance Expenses*: These expenses include the cost of purchased power, labor, materials, supplies, transportation, services, and other expenses, which are necessary to the operation and maintenance of the Electric Utility. These expenses do not include an allowance for depreciation or replacement of capital assets, any monies for the payment of interest on indebtedness or any monies transferred to a Reserve Fund.

**Debt Service**: Included in the debt service component of cost is the annual principal of and interest on bonds and related costs/transfers payable from the net revenues.

**Capital Improvements**: These expenditures are for the purpose of paying the cost of construction or acquisition of necessary improvements, betterments, extensions, enlargements or additions to, or the renewal and replacement of capital assets of the system and for unusual or extraordinary repairs thereto.

Revenues Available for Other Lawful Purposes: This component of cost is paid out of revenues and includes (a) any additional capital improvements to be financed from revenues; (b) additional working cash to provide for the payment of expenses incurred in providing service prior to the receipt of revenues associated with such service; (c) the establishment of operating reserves for special purposes such as providing funds for self-insuring the facilities against certain perils and for the stabilization of rates to smooth out rate increases and minimize customer rate shock, (d) transfers of certain amounts of revenues from the earnings of the Electric Utility to the City; and (e) allowances for any other lawful purpose.

**Revenue Credits**: In the determination of projected annual costs, adjustments should be made to reflect among other things, (a) the receipt of revenues from the investment of monies, and (b) the receipt of revenues from other operating sources such as the rental of land, the use of poles and the sale of scrap. The recognition of these revenue credits reduces the overall annual revenue requirement from electric rates to ultimate customers.

Total Annual Net Revenue Requirements: The total of the cost components described above less other income and other operating revenues is the total annual net revenue

requirements and such total represents the amount of revenues required to be recovered through rates and charges to ultimate customers.

# **Projected Revenue Requirements**

Electric rates should be set at a level such that the revenues produced will be sufficient to meet near future revenue requirements. An important objective of a projected test year is to establish rates and rate levels that will also reflect the then current and near future costs of providing service and market conditions. Thus, it is necessary to estimate or project the various cost components over a reasonable period of time in order to determine the required rate levels. Projections must consider changes in operating practices, new facilities, increased regulatory (environmental) costs, expected changes in cost, and other factors that may affect the overall cost of operating and maintaining the utility system.

It was determined that the revenue requirements for this 2017 Electric Rate Study would be predicated on the adopted budgeted costs of the Electric Utility for the fiscal year ending September 30, 2018. The budgeted expenditures were used as a baseline in the development of the projections of the annual revenue requirements for the Test Year ending September 30, 2018. Based upon that detailed data and certain adjustments to reflect any known and anticipated changes and certain pro forma adjustments, the Consultant, together with members of the management and staff of the City, developed detailed estimates of projected expenditures for the Test Year 2018.

# **Assumptions and Considerations**

The development of the projected revenue requirements for the Test Year required certain assumptions and considerations in order to reflect certain known or anticipated changes and certain pro forma adjustments. The analyses, estimates and projections summarized herein have been based upon an understanding of certain contracts, agreements, regulations, statutory requirements and planned operations. In the preparation of this report, certain assumptions have been made with respect to conditions, which may occur in the future. While these assumptions are reasonable for the preparation of this study, they are dependent upon future events and actual conditions may differ from those assumed. To the extent that actual future conditions differ from those assumed herein or provided to us by others, the actual results will vary from those projected.

The major assumptions and considerations included in the development of the projected annual revenue requirements have been divided into two categories and are listed below:

### General

- 1. The general economic activity experienced in recent years will continue at current levels and annual inflation will remain at existing levels.
- 2. Existing federal and state environmental laws, including the Clean Air Act Amendments of 1990, the Clean Air Interstate Rule and the Clean Air Mercury

- Rule, will continue to be implemented, applied and enforced, and no new laws, regulations, rules and interpretations will be imposed on FMPA or the City resulting in more stringent environmental restrictions in the near term.
- 3. There will be no material change in the taxation of fuel used to produce electricity.
- 4. There will be no material change in the taxation of municipally-owned or municipally financed electric generation or purchased power, transmission and distribution systems.
- 5. There will be no material change in the level of federal, state or local regulation of municipally-owned utilities.
- 6. The existing form of governance and policies established by the City will continue throughout the study period.
- 7. The City will continue to be the exclusive owner and operator of the Electric Utility, including its transmission, distribution, and customer care facilities.

# **Specific**

- 1. The fiscal year ending September 30, 2018 revenues and expenses for the Electric Utility and the underlying assumptions included therein provide a reasonable basis and reflect normalized system operation.
- 2. As discussed in Section 2, the sales forecast was the basis for the development of the projected retail energy and demand requirements for the Test Year. It should be recognized that (a) any meaningful variances in the load characteristics of existing or new customers, and/or (b) any differences in expected initiation of service for anticipated new customers, and/or (c) differences in the expected effectiveness of the various energy conservation programs initiated and contemplated by the City and/or (d) any changes in federal or state legislation that permit customers to select their energy service provider may result in a distortion and/or an over or under recovery of revenue requirements for the Test Year.
- 3. Power supply costs used herein are predicated in part on the demand and energy related cost data estimated for OUC and FMPA, on the purchase of power supply from OUC and FMPA and on costs associated with solar power production.
- 4. Projected purchased power expenses have been estimated based on an analysis of purchased power expenses assuming an overall increase in kWh usage from 2017 of 0.5% per year.
- 5. No new debt service has been assumed for the near term.
- 6. Capital improvement expenditures have been estimated each year, based on a review of the City's Capital Improvement Plan.
- 7. The amount for the Transfer to the General Fund has been based on current City policies.

8. Projected revenues from existing rates have been estimated based on the projected increases in sales from 2017 levels of 0.5% per year.

Shown on Table No. 3-1 are the various expenditures and revenues for the fiscal year ending September 30, 2018, and the adjustments discussed herein. In addition, each of the adjustments is noted in the footnotes to Table No. 3-1. The development of the projected revenue requirements required certain assumptions and considerations in order to reflect certain known or anticipated changes and certain pro forma adjustments. The analyses, estimates and projections summarized herein have been based upon an understanding of certain contracts, agreements, regulations, statutory requirements and planned operations. In the preparation of this report, certain assumptions have been made with respect to conditions, which may occur in the future. While these assumptions are reasonable for the preparation of this study, they are dependent upon future events and actual conditions may differ from those assumed. To the extent that actual future conditions differ from those assumed herein or provided to us by others, the actual results will vary from those projected.

Table No. 3-2 sets forth the detailed calculations of the projected rate revenues by rate class and Table No. 3-3 shows the calculations of the projected power costs based on data provided by the City. Table No. 3-4 sets forth the calculation of the Power Cost Adjustment (the "PCA") based on projected costs and energy purchased for the calendar year ending December 31, 2018. Table No. 3-5 summarizes the Capital Improvement Plan.

# **Summary**

Based on the projected Test Year revenue requirements developed on Table No. 3-1, the existing rates produce revenues that are less than the cost of providing service on a system wide basis. The projected deficiency is summarized below.

| Description                                     | Projected<br>Test Year 2018 |
|---|-----------------------------|
| Net Revenue Requirements                        | \$30,812,193                |
| Total Existing Rate and Other Operating Revenue | 29,822,169                  |
| Deficiency                                      | (\$990,024)                 |
| Percent of Existing Revenue                     | -3.4%                       |

This deficiency is associated with the base rate revenues, while the purchased power expense will be collected through the PCA. As shown on Table No. 3-1, the projected power cost savings for 2018 compared to 2017 are approximately \$4.3 million, which results in a net savings of approximately \$3.4 million, or 11.2%.

2017 Electric Rate Study

### **Summary of Projected Revenue Requirements and Existing Rate Revenues**

Fiscal Year Ending September 30

**2017 Electric Rate Study** 

### Summary of Projected Revenue Requirements and Existing Rate Revenues

### Footnotes to Table No. 3-1

- [1] Based on 2018 Adopted Budget dated September, 2017.
- [2] Unless otherwise noted, operating expenses are based on the 2018 Adopted Budget.
- [3] Based on estimated purchase power costs for Calendar Year 2018, consistent with the PCA adjustment of \$0.05321 per kWh and total sales of 270,313,813 kWh shown on Table No. 3-4.
- [4] Based on information provided by the City. Assumes no new debt service.
- [5] Based on existing rates.
- [6] From Projected Revenue Table No. 3-2, Page 2.
- [7] Based on 2017 Power Costs of \$18,726,000 less projected 2018 Power Costs of \$14,383,000.

<sup>[1]</sup> Amounts shown are projected by the City and reflect estimated direct construction costs and exclude the estimated costs of financing, (i.e. interest during construction and reserves, etc.)

<sup>[2]</sup> Assumes no new debt issued.

<sup>[3]</sup> Balance to be funded from Operating Revenues.

# Section 4 FUNCTIONALIZATION AND CLASSIFICATION OF COSTS AND DEVELOPMENT OF ALLOCATION FACTORS

### **Functionalization and Classification**

In allocating utility costs to the various customer classes, there are three major processes: functionalization, classification, and allocation. The functionalization and classification of the Test Year revenue requirement are discussed in the first part of this section of the report. The development of allocation factors for the Test Year revenue requirement is discussed and set forth in the second half of this section.

# **Functionalization of Test Year Expenditures**

Although budgeting and accounting systems generally follow functional groups, i.e., production, transmission, etc., certain costs such as those associated with administrative and general expenses and bond service generally are not assigned by accounting and budgetary convention to a major function. A cost-of-service study usually requires the rearrangement of certain expenditures into functional groups (i) to be more representative of the expenditure causation, (ii) to combine costs that have been incurred for a similar purpose, and (iii) to facilitate the allocation of cost responsibility. Thus, the functionalization of certain costs is merely a ratemaking mechanism to apportion such costs to the common utility function.

The typical functions of the Test Year Revenue Requirements are developed in Table No. 4-1 and the functionalized costs are summarized below.

| Function and Description   | Test Year<br><u>Amount</u> |
|--|----------------------------|
| <b>Production.</b> Those costs associated with generating or purchasing power and delivering that power to the utility's bulk transmission system  | \$15,372,762               |
| <i>Transmission and Distribution.</i> Those costs incurred in connection with the delivery of power over the bulk transmission system through the primary and secondary distribution system to the utility's consumer. | \$14,259,597               |
| Customer. Those costs that are related to the number, type and size of customers   | <u>\$1,487,334</u>         |
| Total Expenditures   | <u>\$31,119,693</u>        |

An analysis of the Test Year revenue requirements was made to estimate the functionalized Test Year revenue requirements.

## Classification of Various Costs

Historically, electric utility costs or the components of the annual revenue requirement have generally been classified as (1) demand-related, (2) variable or energy-related, and

(3) customer-related. Thus, if a cost or expense is fixed or does not vary directly with the level of kWh purchased or sold, the cost was assumed to be generally related to the demands or load of the customers and was allocated to the various customer classes on the basis of demand or load relationships. Debt service is one example of an expenditure generally classified as demand-related. If a cost or expense was viewed to vary with the amount of kWh the electric utility sold, the cost or expense was usually classified as energy-related and allocated to the various customer classes on the basis of kWh relationships. Purchased energy costs are a primary example of expenses classified as variable or energy-related and allocated on the basis of kWh sales. If the cost is directly related to the number of customers which are being served, these costs would generally be classified as such and allocated to the customer classes based on the customer relationship among the customer classes. An example of customer-related costs is meter reading expenses.

Until such time that the development of more detailed data with regard to hourly usage characteristics and costs is economically justified or legally required, the classification of costs described below reflects usual regulatory practice as well as a reasonable and equitable approach.

**Demand (Fixed) Costs:** Are defined as those costs incurred to maintain in readiness-to-serve an electric system capable of meeting the total combined demands of all classes of customers. Demand costs are those costs that are generally fixed in the short-run, that do not materially vary directly with the number of kWh generated or sold, and that are not defined as customer costs. Demand costs will include that portion of operation and maintenance expenses; debt service; renewals, replacements and improvements; and other costs which are not designated as specifically customer or variable energy costs.

**Customer Costs:** Are defined as those costs directly related to the number, type and size of customers, such as customer accounting and collecting, and costs of meters and services.

**Energy (Variable) Costs**: Are defined as those costs that vary substantially or directly with the amount of energy sold or generated and purchased, including such items as fuel and a portion of operation and maintenance expense for production facilities.

# **Development of Allocation Factors**

### General

This section discusses the development of the factors utilized to allocate the capacity related, energy related, customer related, and other costs to the various customer classes. The aforementioned costs are allocated to the customer classes according to their respective customer class, and the particular cost allocation factor developed for each class and for each type of cost. The customer classes include Residential, General Service Non-Demand, General Service Demand Secondary, General Service Demand Primary, General Service Demand – Large Power, General Service Demand Low Load Factor, and Lighting.

### **Demand Allocation Factors**

"Demand Allocation" refers to the basis on which capacity and other demand related costs are distributed or assigned (allocated) among the various customer classes for the purpose of determining the revenues required from each class to recover such costs. The demand allocation factors, as developed and used herein, reflect the cost responsibility for each of the various customer classes in relation to the capacity or demand related costs to be allocated. The demand allocation factors were used to apportion the following capacity or demand related costs among the various customer classes.

- Purchased power expenses (fixed capacity costs only);
- Transmission and distribution expenses;
- Debt service requirements;
- Allowances for renewal and replacements, and reserves; and
- Payments to the City.

The demand allocation factors were developed based on historical demand and energy relationships filed with the Public Service Commission investor owned utilities and based on the City's historical billing demands. The demand allocation factors are based on the estimated annual coincident and non-coincident peak demands. Table No. 4-2 summarizes the demand allocation factors.

# **Energy Allocation Factors**

Energy allocation factors are the basis for apportioning those costs or expenses classified as variable or energy related and assumed to vary directly with the level of kWh sales or generation. The costs classified herein as variable or energy related are fuel, purchased power, and the variable portion of other production expenses.

The projected fiscal year energy sales data are discussed in Section 2. The resulting energy allocation factors are shown on Table No. 4-3.

### **Customer Allocation Factors**

Customer costs are defined herein as those costs related to the number of customers and the size of service required. Included in the customer related costs are the costs associated with meter reading, meter maintenance, customer installations, billing, collecting, and other customer related accounting, service, and information functions. The customer allocation factors were based on the projected average number of customers in each customer classification during the Test Year.

In apportioning customer related costs and revenues to the various customer classifications, customer allocation factors were utilized that recognized weighted and unweighted customers and fixtures. The customer weighting factors were based on Duke Energy Florida customer charges. The customer allocation factors are shown on Table No. 4-4.

# **Other Allocation Factors**

Certain elements of the annual revenue requirement are related to revenues. Miscellaneous other allocation factors including the revenue allocation factors are set forth in Table No. 5-1.

2017 Electric Rate Study

<sup>[2]</sup> Weighted customers are equal to Column (b), Unweighted Customers multiplied times Column (d), the Weighting Factor.

# Section 5 ALLOCATED COST OF SERVICE

### General

As one of the factors considered in the development of the proposed rate levels and rate structures included herein, certain analyses common in ratemaking have been employed which provide a reasonable indication of the revenue levels required to recover the full cost of service or revenue requirement of each customer class. Since it is not the practice in utility accounting to maintain a subdivision of accounts that will report the cost of rendering service to each customer class, an allocation of costs must be made on the basis of parameters predicated upon the available classifications of operating expense and utility plant.

### **Rate Classifications**

The present customer classifications are as follows:

- Residential
- General Service Non-Demand
- General Service Demand Secondary
- General Service Demand Primary
- General Service Demand Large Power
- General Service Demand Low Load Factor
- Lighting

# Allocation and Assignment of the Cost of Service

The allocated cost of service was developed, along with the target rate increase for each class, based on a comparison of existing rate revenues.

The projected Test Year revenues under the existing rates and charges, the revenue increase, and the percentage increase necessary to recover the projected cost of service for each of the major rate classifications, as summarized from the various detailed tables included in this section, are as follows:

| Toct | Year  | 20 | 11Q |
|------|-------|----|-----|
| 16/1 | Y PAI | 71 | חו  |

|  | Total Existing |            |      |
|--|----------------|------------|------|
|  | Rate Revenue   | Target Inc |      |
| Customer Class                           | (\$000)        | (\$000)    | (%)  |
| Residential                              | \$15,010       | \$630      | 4.2% |
| General Service Non-Demand               | 1,753          | 35         | 2.0% |
| General Service Demand - Secondary       | 10,089         | 252        | 2.5% |
| General Service Demand - Primary         | 1,385          | 35         | 2.5% |
| General Service Demand - Large Power     | 673            | 17         | 2.5% |
| General Service Demand - Low Load Factor | 225            | 8          | 3.5% |
| Lighting                                 | 385            | 13         | 3.5% |
| Total System                             | \$29,518       | \$990      | 3.4% |

Table No. 5-1, consisting of five schedules, sets forth the detailed allocation of the various Test Year costs to each of the major customer classes.

**Schedule I** sets forth the various allocation factors described in Section 4 which were utilized in the cost of service study as the basis for the allocation of the majority of the Test Year revenue requirements to the various rate classifications. However, for certain of the revenue requirements the cost allocation factors were developed within the model in order to more appropriately allocate the revenue requirements to the customer classifications.

**Schedule II** provides a summary of the functionalization and classification of the projected Test Year operation and maintenance expenses and the allocation and assignment of the classified functional expenses to the various rate classifications. The various elements were allocated in accordance with the allocation factor identification shown in the column titled "Allocation Reference." The identification number, in general, refers to the appropriate corresponding "Alloc. #" shown in the first column on Schedule I of Table No. 5-1.

**Schedule III** provides a summary of the functionalization, classification and allocation or assignment to customer classes of the other revenue requirements for the Test Year, and includes Debt Service; Capital Improvements; Reserves, and payments to the City. The bases of the functionalization and classification of the various elements are discussed in Section 4.

**Schedule IV** sets forth the projected Test Year existing rate and other revenues by rate classification.

**Schedule** V summarizes the results of the allocated cost of service study including the indicated revenue increases by customer class.

# General Rate Design Criteria

Rate design is the culmination of a rate study whereby the rates and charges for each customer classification are established in such a manner that the total revenue requirement of the system will be recovered in an equitable manner consistent with the results of the allocated cost of service study and any applicable orders and/or requirements of local, state, and federal regulatory authorities. To the extent possible, rate design should consider and reflect overall revenue stability, historical rate form, conservation considerations, competitiveness with neighboring utility systems, and the policies of those charged with the management and operation of the City.

The proposed rate levels and rate structures developed and submitted to the City for consideration and adoption should continue to meet the following electric utility rate criteria for service provided by municipally owned utilities:

- Electric rates should be based on a rate policy which calls for the lowest possible prices consistent with customer requirements, quality service efficiently rendered, and a payment to the City.
- Electric rates should be simple and understandable.
- Electric rates should be equitable among classes of customers and individuals within classes, taking into consideration the cost of service.
- Electric rates should be designed to encourage the most efficient use of the utility plant and discourage unnecessary or wasteful use of service.
- Electric rates should comply with applicable orders and requirements of local, state and federal regulatory authorities that have jurisdiction.

# **Proposed Rates**

The existing rates and the proposed rates necessary to recover the revenue requirements are summarized on Table No. 6-1. Table No. 6-2 shows calculation of the projected revenues at the proposed rates.

# **Power Cost Adjustment**

It is recommended that a separate rate component continue to be implemented that recovers the cost of purchased power. It is proposed that this factor continue to be calculated every month.

# **Summary**

The following is a comparison of the projected Test Year revenues produced by applying the projected billing determinants to the existing rates and the proposed rates for each customer classification:

### Existing Rate Revenue Compared to Proposed Rate Revenue

Test Year 2018

|  | Existing     | Proposed     |          |  |  |  |  |
|--|--------------|--------------|----------|--|--|--|--|
|  | Rate Revenue | Rate Revenue | Increase |  |  |  |  |
| Customer Class                           | (\$000)      | (\$000)      | (%)      |  |  |  |  |
| Residential                              | \$15,010     | \$15,661     | 4.3%     |  |  |  |  |
| General Service Non-Demand               | 1,753        | 1,796        | 2.4%     |  |  |  |  |
| General Service Demand - Secondary       | 10,089       | 10,346       | 2.6%     |  |  |  |  |
| General Service Demand - Primary         | 1,385        | 1,421        | 2.6%     |  |  |  |  |
| General Service Demand - Large Power     | 673          | 690          | 2.5%     |  |  |  |  |
| General Service Demand - Low Load Factor | 225          | 233          | 3.6%     |  |  |  |  |
| Lighting                                 | 385          | 398          | 3.5%     |  |  |  |  |
| Total System                             | \$29,518     | \$30,544     | 3.5%     |  |  |  |  |

The above rate increases are related to increased base rate costs. However, when the new power supply costs begin in January 2018, it is projected that annual power costs will decrease by approximately \$4.3 million, or a net savings of approximately \$3.4 million or 11.4%. The following table shows the projected net savings by customer class.

## **Projected Net Savings by Customer Class**

Test Year 2018

|  | Existing<br>Rate Revenue | Net<br>Savings | Net<br>Savings |
|--|--------------------------|----------------|----------------|
| Customer Class                           | (\$000)                  | (\$000)        | (%)            |
| Residential                              | \$15,010                 | \$1,556        | 10.4%          |
| General Service Non-Demand               | 1,753                    | 189            | 10.8%          |
| General Service Demand - Secondary       | 10,089                   | 1,314          | 13.0%          |
| General Service Demand - Primary         | 1,385                    | 187            | 13.5%          |
| General Service Demand - Large Power     | 673                      | 103            | 15.2%          |

# General

This section provides a summary of the billing effects of the proposed rates for major rate classifications. Specifically, the tables in this section provide for two types of billing comparisons for each major rate classification at various levels of usage which include (i) monthly bills calculated under the City's proposed rates compared with bills calculated under its existing rates, and (ii) monthly bills calculated under the City's existing and proposed rates compared with those calculated under the rates of selected utilities for the billing month of December 2017.

# **Existing and Proposed Rates**

Table Nos. 7-1 through 7-6 provide a comparison of monthly bills calculated under the proposed rates and the existing rates over a wide range of usage levels.

# Comparisons with Other Utilities

Table No. 7-7 sets forth the City's typical monthly electric bills applying existing and proposed rates compared to monthly bills of other Florida electric utilities. As can be seen from these tables, the City's proposed monthly bills fair favorably as compared to other Florida utilities.

# **Comparison of Existing and Proposed Residential Service Rates [1]**

|                           |          | Residential | Service   |
|---------------------------|----------|-------------|-----------|
|                           |          | Existing    | Proposed  |
| Customer Charge           | (\$)     | \$8.00      | \$8.70    |
| Energy Charge All kWh     | (\$/kWh) | \$0.04670   | \$0.05070 |
| Minimum Charge            | (\$)     | \$8.00      | \$8.70    |
| Power Cost Adjustment [2] | (\$/kWh) | \$0.07362   | \$0.05321 |

<sup>[1]</sup> Amounts shown are based on the rates for single phase service and reflect when applicable, inside city service. In addition, amounts include December 2017 fuel adjustments except where noted but do not include taxes or franchise fees.

<sup>[2]</sup> Test Year 2018 Power Cost Adjustment.

<sup>[3]</sup> Rates including the Power Cost Adjustments are for January 2018.

<sup>[4]</sup> Amounts shown include the energy conservation, capacity, environmental and storm cost recovery charges where appropriate, as filed with the Florida Public Service Commission (FPSC). Franchise fees are not included but range up to 6 percent for each of the IOU's listed.
