2540 Shumard Oak Boulevard
Tallahassee, Florida 32399-0850

Re: Orchid Springs Development Corp.; Docket No. 20180063-WS
Application for limited proceeding water and wastewater rate increase

Dear Ms. Stauffer,

In response to the request from the Commission staff to supplement the filing submitted by the utility for rate relief in the above referenced docket, I am hereby filing additional information that should be made a part of that application for rate relief. I have outlined below the reference to the rule for which this supplemental information is filed, followed by either a statement or a reference to an attachment to respond to the rule requirement:

Supplemental Information List:
25-30.445 General Information and Instructions Required of Water and Wastewater Utilities in an Application for a Limited Proceeding.

(1) Each applicant for a limited proceeding shall provide the following general information to the Commission:

(d) The address within the service area where the application is available for customer inspection during the time the rate application is pending.

Utility's response: The utility's application will be available at the utility's offices at 346 East Central Avenue, Winter Haven, Florida 33880. While the utility office is not located within the service area, it is located nearby and is the only available place reasonably convenient for customers to inspect the application during business hours (Monday – Friday, 8:00 am to 5:00 pm).

(e) A statement signed by an officer of the utility that the utility will comply with the noticing requirements in Rule 25-30.446, F.A.C.

Utility's response: Attached is a statement signed by an officer of the utility indicating that it will comply with those noticing requirements.

(5) In addition to the requirements stated in subsections (1) through (3), the following minimum filing requirements shall be filed with the utility's application for limited proceeding for a Class C water or wastewater utility:

(b) If the limited proceeding is being requested to recover costs required by a governmental or regulatory agency, provide a copy of any rule, regulation, order or other regulatory directive that has required or will require the applicant to make the improvement or the investment for which the applicant seeks recovery. (NOTE: This was already provided for the mowing expense, but still needs to be provided for the other plant costs that the Utility is requesting to recover in the Issue No. 2 – Plant Investment section of the Utility's application, if applicable.)

Utility's response: None of the other plant additions proposed for recovery in Issue No. 2 are specifically required by any regulatory authority. However, the utility system was originally constructed in 1969 and as such both the water and wastewater systems are approximately 49 years old and therefore in need of refurbishment and replacement as monies are available to undertake such projects. In the case of water meters, the utility is undertaking to replace old meters and hoping to do so in a reasonable manner in conformance with sound utility maintenance practices. In the case of the sewer collection system repairs and improvements outlined in Issue No. 2, the utility could face potential DEP action and the possibility of severe environmental impacts if spills occur from failure to properly maintain the system. In short, all of the repairs are undertaken in order to ensure that the utility continues to provide adequate and sufficient quality of service and to maintain the system with sound utility operation principles.

(e) Provide a description of any known items that will create cost savings or revenue impacts from the implementation of the requested cost recovery items. (NOTE: The revenue impacts were already provided, so the Utility only needs to provide supplemental information regarding any known cost savings.)

Utility's response: The additional investments and operating costs for which the utility seeks recovery do not result in any known costs savings at this time. These capital costs and operating costs are merely costs the utility is currently incurring which require recovery in order to continue to maintain the system in a reasonable manner and continue to provide good quality of service in accordance with regulatory requirements.

(g) Annualized revenues for the most recent 12-month period using the rates in effect at the time the utility files its application for limited proceeding and a schedule reflecting this calculation by customer class and meter size.

Carlotta Stauffer, Clerk
May 11, 2018
Page 3

Utility's response: Attached is a calculation of annualized revenues for the calendar year ended December 31, 2017 using the rates in effect at the current time and reflecting this calculation by customer class and meter size.

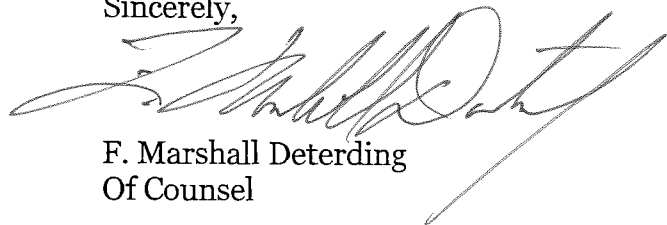

(h) A Class C water utility's application for limited proceeding shall also include:

- 1. A copy of all customer complaints that the utility has received regarding DEP secondary water quality standards during the past five years; and,**
- 2. A copy of the utility's most recent secondary water quality standards test results.**

Utility's response: The utility has received no customer complaints regarding FDEP secondary water quality standards during the past five years. A copy of the utility's most recent secondary water quality standards test results are attached hereto.

We believe that the above and the attachments comply with all the additional requests from the staff. However, should you or any members of the Commission staff need any further information or have any questions in this regard, please let me know.

Sincerely,

F. Marshall Deterding
Of Counsel
