Re: Fuel and Purchased Power Cost Recovery Clause with Generating
Performance Incentive Factor; FPSC Docket No. 20180001-EI

Dear Ms. Stauffer:

This is to advise that Tampa Electric expects its capacity cost recovery clause year end over/under recovery to exceed ten percent because of the company's relatively small amount of total capacity costs, which have been declining over recent years, and the relatively large value of the company's prior period true-up in comparison. Without the 2017 true-up, the percentage is only about one percent. Accordingly, the company does not request a mid-course correction and plans to include the 2017 final true-up amount in next year's rates as it would normally do.

Thank you for your assistance in connection with this matter.

Sincerely,

James D. Beasley
