Bill,

Please have the mechanic do a close inspection of the crane. The crane must work (this is a deal breaker). Please do a close inspection of the crane stress mounting points, there should be no stress cracks, no touch up paint/new paint concealing problems, etc. If not sure about this, take some good pictures and send them to us. We are worried about spider cracks. Please inspect cabling (no pig tails, kinks, etc.). Please pay out the cable while keeping some tension on. Make sure the crane has full range of motion in every operational plane and is fully functional in all other respects. Note any problems.

Please run the compressor, inspect tank, etc. Note any problems.

Please fully inspect the truck and test drive the truck. Note any problems.

Please have the mechanic give Andy a call and give him a rough idea of when he would like to visit Western Specialty Vehicle and Andy will have the vehicle ready for inspection and test drive.

Thank you Bill for helping us with this. Below is all of the contact and truck info. Best - Chris (305) 522-0052

Western Specialty Vehicle
520 W. Coal City Rd.

2012 Ford F-450 mechanics truck w crane and compressor
STOCK NUMBER 7-613-CV
VIN# 1FD9X4HY7CEB59167
160,000 miles
- ONE OWNER
- 6.8L SOHC EFI Triton 30 valve V10 Engine
- 4 WHEEL DRIVE
- 9 FOOT SERVICE BED
- 4000 LB ELECTRIC OVER HYDRAULIC CRANE
- GOOD TIRES
- CLEAN SERVICE BODY
- COLD AIR CONDITIONING
- CRUISE CONTROL
- EXTENDED CAB

This truck is in excellent shape and runs out very well. The engine and transmission are both in great working order and the 4 wheel drive works with no issues. The electric over hydraulic crane is easy to use and includes a wireless remote. There are not many trucks around this clean.

Dear Rob Derryberry,

Greetings from CommercialTruckTrader!

We're writing to let you know that we forwarded your message to Western Specialty Vehicle Sales, the seller of the 2012 FORD F450 listed on our website.

YOUR MESSAGE

I spoke to Andy in regard to this vehicle and was led to believe that the truck was in excellent shape. I paid a mechanic to inspect the crane truck with advance notice as requested and was told that the crane is non-functional? Why was this information not provided in the description or over the phone? While I am still interested in the vehicle I would like to know exactly what repairs were needed to get the crane operational???
