Specifications for Cherrington Model 3000 Beachcleaner / Sandsifter

Length (overall)	111"
Height	84"
Weight	3400 lbs
Width (overall)	59"
Wheel Base C-C	78"
Wheel Span C-C	42"
Turning Radius	Pivots on either rear wheel
Cleaning Width	36"
With Optional Digger Extensions	48"
Digging Depth	0" - 4" in varying applications
Ground Clearance	5"
Hopper Capacity9 cu. ft / 1000 lbs.
Dump Height	5'6"
Groomer; automatic or independent control	60"
Engine Type	24 HP Liquid Cooled Diesel
Propulsion	All wheel hydrostatic drive
Secondary Systems	Hydraulic (Controlled from operator's position)
Steering	Prioritized power
Cleaning Method	Slanted sifting screens & overhead flights
Speed	0 - 5 MPH
Tires	29 x 12.50-15 NHS STG
Digger Points	High carbon steel
Paint	Grit blasted, corrosion & abrasion resistant oven baked primer & polyester top coat or equivalent
Color	Industrial yellow
Interchangeable screens ..	Abrasion & corrosion resistant Corten steel OR oil tempered hardened woven wire

Engine: The machine is furnished with a diesel engine producing approximately 24 horsepower. The engine is of adequate size to propel the machine with all power accessories in operation.

Drive System: A closed loop hydrostatic drive transmits variable speed forward and reverse power to all wheels. A separate fixed displacement pump provides power to the hopper, hoist, dump, and digger-depth control cylinders, the screen oscillator motor, and the overhead conveyor motor.

Wheels and Tires: The machine has one front and two rear wheels. Steering is on the front wheel for best maneuverability. All tires are of a minimum size 29 x 12.50-15 NHS high flotation, with a super terra-grip tread. Rear tires are fluid filled for added traction and a lower center of gravity.

Oscillating Screen and Digger: The machine is capable of digging a loose dry sand depth of 4 inches, fully controlled hydraulically by the operator while the machine is in motion. The digger points are of high carbon steel. The minimum cleaning width is 36 inches. The easily changed oscillating screens come with four different size openings. A T-bar overhead flight system bolted to two heavy duty steel (620 implement) chains is used to move debris collected on the screens into the hopper.

Hopper: The hopper has a capacity of one-third cubic yard. It is hydraulically operated for dumping with a five foot six inch clearance in the raised position, capable of dumping into debris boxes or pick-up trucks. The dumping operation is fully controlled from the operator's normal seated position.

Specifications for Cherrington Model 3000 Beachcleaner / Sandsifter

Paint: All exterior metal surfaces are grit blasted, epoxy primed and topcoated with chemical, corrosion, and abrasion resistant oven baked primer & polyester top coat or equivalent. Standard color is Industrial yellow. Screen frame components, flights and groomer components are hot dip galvanized.

Operator Controls: All controls are actuated from the operator's station.

Safety Features: The machine has the following safety features included on the machine in accordance with current standards.

1. Safety guards and shielding
2. Slow moving vehicle symbol
3. Neutral start switch
4. Flashing beacon
5. Emergency stop switch built into the footrest
6. Certified R.O.P.S.

Other Features:

1. Engine hourmeter
2. Fuel level indicator
3. Engine temperature gauge
4. Engine oil pressure gauge
5. Voltmeter gauge
6. Locking caps on fuel and hydraulic fluid tanks
7. Towing lockout which enables the machine to be towed short distances in the event of engine failure
8. Switches to prevent hoist and hopper damage

Optional Equipment and Spare Parts Package: See page one.

Manufacturer's Identification: A durable identification plate stating the manufacturer's name, location, model, and other suitable information to identify the Beachcleaner for parts or repair is permanently attached to the frame.

Materials: All materials, parts and assemblies are new and are of current manufacture. Workmanship, fabrication and assembly are in conformance with standard manufacturing and engineering practices. Bolts are of sufficient length to assure a full thread nut. All bolts are fitted with self-locking nuts or with lock washers. All welds and welding practices conform to the latest American Welding Society Standards.

Warranty: 12 months on machine, including engine, pumps, motors and other components. Excludes normal maintenance and replacements wear parts, such as, but not limited to, electrical components, filters, oil, belts, chains, conveyor parts, digger points and screens.

Disclaimer: The Company reserves the right to make any changes deemed necessary to the above specifications without notice, and is not liable for unintentional errors in the specifications.
