Subject: New Generator Layout

Is this what you had in mind? I think we could shorten the access walkway on the right side where the ladder is shown. Make it match the one on the chemical slab side.

There will be a little bit of the old foundation sticking out on that one corner, but if I slide the new foundation to the east so the narrow part lines up with the old slab, we will have more of a pinch point along the fence.

Let me know if you want this changed or if it is OK.

Edward R. Castle, PE
