Dustin,

No technical concerns that i am aware of, mainly logistical. I will send out a meeting invite.

Best regards,

Steve Suggs E.I.
Weiler Engineering Corporation

Steve,

That should be fine. Are there technical concerns as well? If so, I might should involve a member from Applications and/or Design team on the conference call.

Thanks,

Dustin Treat

Thanks Dustin,

Based on the provided tentative schedule we are going to have some conflicts with the current construction project at the site. Based on our current project a late May-June mobilization date would be best. I would like to have a conference call so that we can get the schedule and other concerns worked out.

How does 1:30pm on March 28th work for you?

Best Regards,

Steve Suggs E.I.

Steve,

Regarding the effluent pipe size from east clarifier weir trough, this was a typo on the submittal and should read 8" sch 40 steel pipe. We will get this corrected on our end. Also, please see below tentative schedule. If any of the dates should change, I will notify you immediately. Let me know if you have any questions or concerns.

Tentative Schedule:
Mobilization - 4/23/18
Start of Coating - 6/20/18
Completion - 8/29/18

Thanks,

Dustin Treat

All,

See attached submittal approved with comments. If you have any questions let me know.

We would like a tentative schedule that shows mobilization dates, start of coating, etc.. from Evoqua regarding this project.

Best regards,

Steve Suggs E.I.
